FAIL PLANTING

THE QUESTION is often asked: When is the better time to plant, fall or spring? The answer depends upon what is to be planted, and when the question is asked. If it is asked in the summer or fall, then fall is undoubtedly the better time to plant all trees, shrubs and herbaceus plants of unquestioned hardiness, and then the fall is a time of comparative leisure in gardening operations and the weather is more favorable and the soil is usually in better condition and pleasanter to work in than it is in our springs, wet and cold as they are nine years of the should be planted early enough in the fall for them to become established before freezing weather sets in, otherwise they are apt to be thrown out of the ground by frost in winter time. This can be prevented by a mulching of stable manure, and the mulching is a benefit in any event. As far as possible, we would advise the planting of hardy plants in September or early in October, but of course many of them are not in condition to transplant until the fifteenth of October. Hardy Roses, Peonies, Iris, and many other hardy plants give best results when planted in the fall. Trees and shrubs may be planted from the fifteenth of October and the many other hardy plants give best results when planted in the fall. Trees and shrubs may be planted from the fifteenth of October and the many other hardy plants give best results when planted in the fall. Trees and shrubs may be planted from the fifteenth of October and the many other hardy plants give best results when planted in the fall. Trees and shrubs may be planted from the fifteenth of October and the many other hardy plants give best results when planted in the fall. Trees and shrubs may be planted from the fifteenth of October and the many other hardy plants give best results when planted in the fall. Trees and shrubs may be planted from the fifteenth of October and the many other hardy plants give best results when planted in the fall. Trees and shrubs may be planted from the fifteenth of October and many other hardy plants give best results when planted in the fall. Trees and shrubs may be planted from the fifteenth of October until the ground freezes. Magnolias, Rhododendrons, Azaleas, and many other things should be planted in the spring, so as to have a season's growth before having to endure a winter's severity; but when anything is ordered that should not be planted until spring, we do not ship until then.

KEIZERKROON TULIPS.

The Largest and Showiest of the Early-flowering Tulips. (See page 5.)

Narcissus Golden Spur (see page 7).

Dutch Bulbs

As a rule, we import bulbs to order only, but many of our customers neglect to send us their orders in time, and we are obliged to buy the stock in this country to fill these late orders, charge higher prices and deliver inferior stock. We have imported a few varieties of the very choicest and most desirable bulbs in excess of our orders and offer them at the same prices as if imported to order. These fine things are described in this catalogue, but the prices quoted will be good only until the stock we have imported is exhausted. We can not buy these bulbs in America and sell them at such low prices. Much of the stock described was personally selected this summer in Europe. We shall be pleased to quote prices on all varieties of Dutch Bulbs not offered in this list. These will not be of our own importation, but will be purchased from American dealers.

Narcissus, Bicolor Empress

(The Queen of Daffodils)

Very large flowers of pure white, with rich yellow trumpet; strikingly beautiful; fine for out-of-doors or for forcing. This is the finest of all Daffodils and one of the most beautiful hardy flowers grown. It should be planted where it can remain permanently. It will increase in size and beauty year after year. It really gives me great pleasure to offer this grand Daffodil at the following low prices, and it can now be planted by the hundreds and thousands, as it deserves to be. A few years ago it was selling in Holland at \$40 per hundred, when I thought it one of the most beautiful hardy flowers in cultivation—an opinion I still hold, after growing it in my garden ever since. It is an acquaint-ance that improves with age. The bulbs we offer are from one of the most famous growers in Holland, who has made a specialty of this Daffodil since its introduction. Monster bulbs, 65 cts. per doz., \$4.25 per 100, \$38.00 per 1,000.

Narcissus, Emperor

This is the largest and finest deep yellow trumpet-flowered Daffodil in cultivation, and is really superb, both in foliage and flower. A few years ago it was selling at \$25 per hundred, but acontract made in Holland this year enables us to offer enormous bulbs, which often bring four and five splendid flowers each, at the following prices: 65 cts. per doz., \$4.50 per 100, \$38.00 per 1,000.

A Great Tulip, Gesneria (Hortensis)

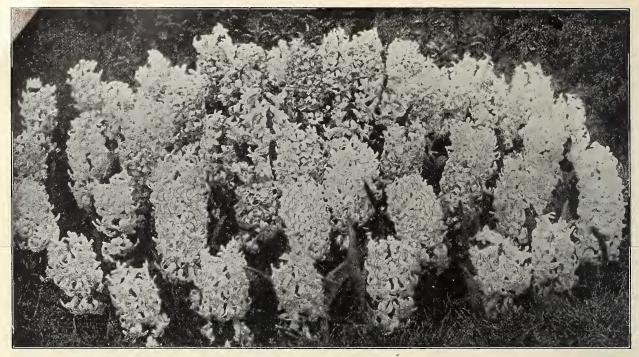

For bedding out in masses it deserves to be largely grown. Height 18 to 24 inches. Flowers of enormous size, on long, graceful stems. Color rich crimson-scarlet, with glittering blue-black center. The demand for this grand Tulip has been so great that it is very difficult to get flowering bulbs. To be sure of getting bulbs that will bloom, we pay a premium in Holland for guaranteed bulbs. This makes them higher priced, but insures that our bulbs will bloom satisfactorily. 40 cts. per doz., \$2.50 per 100, \$21.00 per 1,000.

Late Tulip, Blushing Bride

This is one of the largest, showlest and most beautiful Tulips in cultivation, blooming in May at the same time as Gesneriana. Beautiful rose-pink, slightly shaded white; fine form and extra-large flower, held on a stiff, strong stem, making it a feature in the garden. 40 cts. per doz., \$2.50 per 100.

Late Tulip, Bouton d'Or

Very bright, deep, rich yellow flowers, carried on tall stems. The best late yellow Tulip in cultivation, and fine for cutting. Good for planting in mass or in contrast with the darker varieties of Tulips. 35 cts. per doz., \$2.25 per 100.

Bed of Single Hyacinths.

Darwin Tulips.

Parrot Tulips

Parrot Tulips sometimes do not bloom satisfactorily, owing to improper planting. They like a light, sandy soil, shallow planting and a sunny location.

Parrot Tulips do not receive the attention they deserve. Parrot Tulips do not receive the attention they deserve. They belong to the Late- or May-flowering Tulips and have immense, attractive flowers of singular and picturesque form, and brilliant and varied colors. The petals are curiously fringed or cut, and the form of the flower, especially before it opens, resembles the neck of a parrot. They form extravagantly showy flower-beds, are of endless variation for the form extravagantly shows the heads here were the colors. ety of form and color, and should be grown in every flower-garden in quantities. The Parrot Tulips we import are from the most famous grower of these in Holland, and very superior to those usually sent out.

Darwin Tulips

A handsome May-flowering class, and quite distinct in style of growth from the other late-flowering sorts. Stately in appearance, attaining a height of 18 to 30 inches, and bearing on long stems beautiful, globular flowers of remarkably heavy texture, in a large range of colors, embracing almost every conceivable tint in rose, heliotrope, and the crimes a process of the color of claret, crimson, maroon, and other rich and rare shades. In no class of Tulips has the improvement been so marked, and they are now of the most distinguished character and are unsurpassed, either in the garden or for cutting. They are undoubtedly the most striking and beautiful of all Tulips.

Darwin Tulips are most valuable for permanent planting. With deep planting, 4 to 5 inches in heavy soil and 6 inches in light soil, they will continue to bloom for years, and for this reason they are very valuable for planting in shrub-

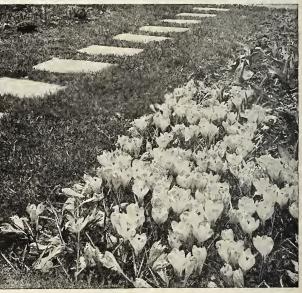

beries and borders.

Special Offer of Golden Spur Narcissi

This is one of the most valuable of the Trumpet Narcissi, with magnificent deep yellow trumpet with brim expanding like Maximus, and large, spreading, full, deep yellow petals. It is free-flowering and splendid both for house culture and outdoors, and is one of the most desirable varieties for naturalizing. By contracting for one hundred and fifty thousand bulbs of this variety, we are enabled to offer them at the following prices, which are less than half the prices usually asked: Large selected bulbs, 55 cts. per dozen; \$3.50 per 100; \$30.00 per 1,000.

Spanish Iris.

Paper-White Narcissi.

Narcissus, Bicolor Victoria

One of the newer varieties and the best of all the Bicolors. Perianth creamy white, trumpet rich yellow, delicately perfumed. Unsurpassed for pot culture or growing outdoors in the garden or the grass. Large, erect flowers of great substance. This splendid variety has given unequaled satisfaction to thousands of customers, and we do not believe we have ever had a complaint about it. Large, selected bulbs, 50 cts. per doz., \$3.25 per 100, \$29 per 1,000.

Paper-White Narcissi

Splendid for growing in pots or water, and can be had in bloom for Christmas or earlier. This is really one of the most satisfactory bulbs for growing in the house. It can be had in bloom early in December, and in succession until spring. Large clusters of pure white, fragrant flowers. Cheaper and very superior to the Chinese Sacred Lily.

Paper-White grandiflora\$0.40 \$2.50 \$21.00 Paper-White grandiflora, extra-sized bulbs .50 3.00 26.00

Spanish Iris

These exquisitely beautiful Irises are almost unknown in this country, yet they are perfectly hardy, of the easiest culture and cheaper than crocuses. There is nothing finer than a bed of these flowers. They bloom early in June and grow 15 to 18 inches high. They have a great combination and variety of color in the same flower; they are very diversed and of great richness, comprising all shades of blue, yellow and bronze, as well as pure white, and are highly useful for decorations and cutting. They should be planted about 5 inches apart. These Irises are literally used by the million in England for cutflowers, and no other flower is more popular. We advise all our customers to try a few hundred, and in large gardens they should be planted by the thousand. The stock we offer is exceptionally fine.

Lilium

SPECIAL NOTICE.-Lily bulbs will be forwarded as they

SPECIAL NOTICE.—Lily bulbs will be forwarded as they arrive. As a rule we can furnish Candidum and Harrisil from end of August on. Canadense, Elegans, Longiflorum, Superbum aud Tenuifolium and all American-grown Lilies, from end of September on. The entire balance of Japanese and European Lilies in November and December.

All varieties of Japanese Lilies except Longiflorum are usually received in November. They are liable to delays of steamers, freight blockades, etc., and we advise the preparation of the Lily beds or borders early in autumn, covering them with 4 to 6 inches of manure, leaves or litter of any kind. This will keep them open and admit of the planting of the bulbs even if not received until December. No Lilies will be shipped after the 1st of December unless special instructions are received to ship later, but order will be held and shipped early in the spring.

Lilium Candidum

(Ready in September and Delivered as soon as Ready)

This is the old-fashioned Easter or Annunciation Lily, with lovely, pure white, cup-shaped flowers, blooming in June. It makes a fall growth, and for this reason it should be planted not later than the end of October. Per doz. 100 Large bulbs ... \$1.50 \$10.00 Selected bulbs 2.00 13.00

that come to America and are much larger than those usually sent out. We expect our Candidum Lily bulbs to be especially fine this season.

Lilium Harrisii

(TRUE BERMUDA EASTER LILY)

(Ready in August)

This Lily is now so well known that it needs no description. It is undoubtedly one of the most popular flowers ever used for forcing. The bulbs we supply are of the highest quality obtainable and are perfectly true, and not mixed with Lilium longiflorum. It cannot be grown outdoors unless extremely well protected in winter. If a Lily of this character is desired for outdoor planting L. Longiflorum should be used. These Lilies can be successfully grown only in a greenhouse. Don't attempt to bloom them in the house. Per doz. 100 Bulbs, 7 to 9 inches in circumference..\$2.25 \$15.00

Lilium Formosum

(JAPANESE EASTER LILY)

An early-flowering variety of Longiflorum Lily, fine for forcing or planting outdoors. Per doz. 100 Large bulbs, 7 to 9 inches. \$1.85 \$13.00 Large bulbs, 8 to 10 inches. 2.50 17.00

Lilium candidum.

Lily-of-the-Valley

Extra selected Berlin pips-none to be had.

Per 100 1.000

Ready in October. For outdoor American pips. planting only \$15.00

Large clumps. Ready in December. Each, 50 cents; dozen, \$5.00.

Longiflorum Lilies.

Special Offer of Superbum Lilies

We make an annual contract to have 25,000 bulbs of this grand Lily grown for us. This enables us to offer it at low prices, which makes it available for naturalizing in quantity. It is unquestionably one of the most satisfactory Lilies that can be planted either in the garden or in meadows, on the edge of woods or in any rough or wild parts of the grounds, where it will take care of itself without any attention whatever after planting. It will also thrive in wet or swampy places. It is a grand Lily, often growing over 8 feet high, and produces twenty to thirty beautiful orange-red flowers in July, when flowers are apt to be rather searce.

Prices of extra selected bulbs, \$1.50 per doz., \$2.60 for 25, \$10.00 per 100, \$24.00 for 250.

Prices of Lilies

These prices include all charges except freight or express charges from Pittsburgh. The measurements given refer to circumference of measurements given refer to circumference of bulbs but the Japanese evidently use an elastic tape, as the bulbs never quite come up to the measurements given. We give these sizes as they are generally used by the trade. We guarantee safe delivery in good condition of all varieties except Auratum when shipped by express. We repack all Auratum Lilies when received and ship nothing but perfectly sound bulbs, but cannot guarantee results in any way, or even that they will arrive in good condition. This variety is shipped at risk of customer. tomer.

Speaking of Shrubs

Miss Jekyl, in her book. Wood and Garden, says: "What a precious thing this fine old Mahonia is! What should we do in winter without its vigorous masses of grand foliage in garden and shrubbery, to say nothing of its use indoors. . When one reflects that Mahonia aquifolium is individually one of the handsomest of small shrubs, that it is at its very best in midwinter, that every leaf is a marvel of beautiful drawing and construction, and that its ruddy winter coloring is a joy to see; and further, when one remembers that in the spring the whole picture changes—that the polished leaves are green again and the bushes are full of tufted masses of brilliant yellow bloom and fuller of bee-music than any other plant then in flower. . . It is the only hardy shrub I can think of that is in one or other of its varied forms of beauty throughout the year."

Lilium Elegans.

Euonymus radicans vegetus.

The Best Evergreen Vine for America

Is ivy the best vine in the world? Doubtless every Englishman will cry "Yes!" because the European or English ivy (Hedera Helix) is the oldest evergreen vine in cultivation and has made the deepest impression in literature, art and history. But if your standard is merit, not associations, there is another vine which seems to me inherently better, viz., the Climbing Euonymus, or, as I now propose to call it, the "Evergreen Bittersweet." True, the form of its leaf is not unique, like that of ivy, but it has one overwhelming advantage in its gorgeous red berries, which are resplendent all winter against a noble background of evergreen foliage. And in many other ways it has greater value than ivy, even in regions where the ivy is hardy.

The accompanying picture gives but a faint hint of the five-fold glories of the Evergreen Bittersweet. In the first place, it is evergreen, and therefore has an obvious advantage over deciduous vines in being beautiful 365 days of the year, instead of two weeks or seven months.

Secondly, it is very accommodating as to soils, climate, exposures; is easy to grow, and will trail over the ground or climb to the noble height of 30 feet.

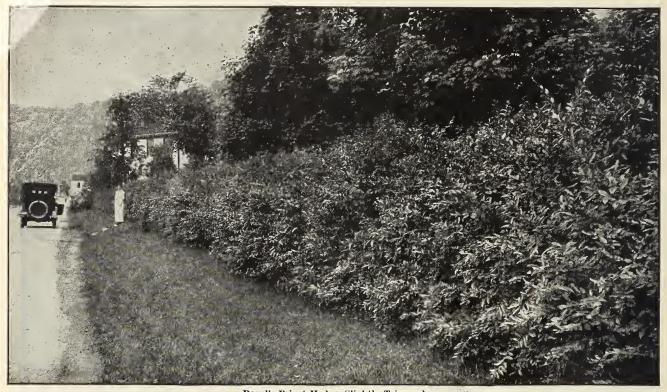

Thirdly, it has an immense advantage over ivy, in being much hardier, growing 20 feet high in New England where ivy can be grown only as a ground-cover.

Fourthly, its superb red fruits, which closely resemble those of our common wild bittersweet, seem divinely appointed to redeem our American winters from their bleak, ugly and cheerless moods.

And, fifthly, it promises to develop a strong American character, becoming universal and dear to the American If I had a million dollars to spare I should like neart. If I had a million dollars to spare I should like to plant an Evergreen Bittersweet against every stone, brick and concrete wall in America. The effect would be electrical, for it would add 100 per cent to the beauty of America. And it would only be anticipating by a hundred years what will surely happen, for it is hardly possible that the world holds any plant with greater power to transform a house into a home. As in England every home and every church is enriched, dignified and every home and every church is enriched, dignified and enobled by ivy, so every American home will come to be connected so closely with the Evergreen Bittersweet that it will be impossible to think of one without the other.—Wilhelm Miller, in the "Garden Magazine." November 1019

We have known for several years of the great merit We have known for several years of the great merit of the vine, Euonymus radicans vegetus, so enthusiastically described by Professor Miller, and have been steadily getting up a large stock of it, and now have several thousand plants. It is a sport from Euonymus radicans, but absolutely distinct from that vine. Planted in rows and kept sheared this vine makes a splendid evergreen hedge. It is also a splendid ground cover plant for either sun or shade.

Perfectly hardy, but when planted in the fall should be pretected with a mulching of three inches of stable manure, being careful not to cover the evergreen foliage. Very slow-growing at first, but when well established grows with great vigor.

Regel's Privet Hedge, Slightly Trimmed,

The Best Hedges

Amoor River Privet

A more slender grower than the common Privet. Hardier than the California while the foliage is finer and of a lighter green, and retains a better color during the winter. It makes a more satisfactory hedge than the California, and should be more extensively planted. We offer the true variety. The Privet generally sold in the South for Amoor River is Ligustrum Chinense, and is not hardy in the North. *While we are reading proof of this catalogue the temperature is about 20 degrees below zero over a wide range of country, which means that California Privet will be again killed to the ground. 15 cts. each, \$1.75 per doz., \$12 per 100.

*This was written in January, 1912. The following spring California Privet was found to be killed to the ground all over the country, even a hundred miles south of Washington City

Regel's Privet

Regel's Privet, Ligustrum Regelianum, is not only the best Privet, but is also one of the very best shrubs for many purposes that we know of. Is perfectly hardy, of most beautiful, pendulous habit and splendid foliage. It is of vigorous growth and will thrive in either sun or shade. In good soil it will attain a height of 8 to 10 feet, and spread almost as great. It is fine as a specimen or for planting in masses in the shrubbery, but its greatest value is for hedging. As a hedge plant it is unsurpassed. It can be kept closely trimmed or trimmed but little, when it will preserve its natural drooping character which is most graceful and beautiful. A partially trimmed hedge of this Privet on the grounds of Mr. Clarence Byrnes, Sewickly, Pa., we think one of the handsomest hedges we have ever seen. On account of its spreading habit this Privet makes a hedge solid to the ground whether it is sheared hard or not. We can not understand why people continue to plant California Privet, which is inferior in every respect and not reliably hardy. Regel's Privet is somewhat higher priced, but on account of its spreading habit it requires only half the quantity that it does of the California Privet to plant a hedge. For a hedge, plant Regel's Privet 18 inches apart in a single row. Good plants, \$1.75 per doz., \$13 per 100; strong plants, \$2 per doz., \$20 per 100; extra strong selected plants, \$2.50 per doz., \$20 per 100.

Japanese Barberry

We are frequently asked to recommend the best shrub for hedge planting, and, after many years, experience, we are decidedly of the opinion that the Japanese Barberry, Berberis Thunbergii, is the best hedge-plant in existence, and either as an ornamental, defensive, trimmed or untrimmed hedge, it is unsurpassed. As an ornamental hedge it is beautiful throughout the year, its abundant crop of bright red berries makes it even more attractive in the winter than the summer. Its compact growth and thorny branches make a defensive hedge that will turn cattle after five years' growth. As an untrimmed hedge, it requires no attention except an occasional cutting of a few straggling branches. The natural growth is so dense and even that it forms a perfect hedge without shearing, but if a formal hedge is desired, by shearing, it can be made as even as a stone wall. This Berberis is absolutely hardy, of the easiest culture, and will grow in any soil or situation. It will stand considerable shade and can be grown under trees if not planted too close to the trunks. It is of slow, compact growth, but will eventually attain a height of 5 or 6 feet. It is also one of the very best of shrubs for general planting. For a hedge, plant a single row, 18 inches apart in the row. We have a very large stock of fine plants which we offer at \$13, \$16, \$20, and \$25 per 100, according to size. Special prices quoted on lots of one to ten thousand on application.

Japanese Barberry Hedge

High-Grade Recleaned Lawn Seeds

Our various mixtures are composed of the finest re-Our various mixtures are composed of the finest recleaned seed, and of the highest purity and germination in each instance. We might mention that you can buy Lawn Seed at all prices. Our mixtures weigh 20 pounds to the bushel. We intend to carry only one grade, and that the best. We also consider, in making up our mixtures, the production of an immediate but permanent effect, by suffine such varieties of grasses in our mixtures to produce putting such varieties of grasses in our mixtures to produce this. Lawn grass seed gives best results when sown in September.

1.25

No more popular plant or shrub has ever been sent out than Hydrangea paniculata grandiflora, and we take great pleasure in offering our customers a large stock of splendid vigorous plants at such extremely low prices as will enable them to plant this effective shrub in quantity. People who have only seen this Hydrangea grown singly as specimens have no conception of how beautiful and effective they are when planted in masses. They are planted in this way at Newport, R. I., which is famous for its fine gardens, and almost as famous for its Hydrangeas.

Border of Hydrangeas.

These Hydrangeas can be planted in connection with other shrubbery or in connection with other shrubbery or in isolated beds, in the same manner as cannas, caladiums or other stronggrowing bedding plants. They are perfectly hardy, and, once planted, they are a permanent addition to the lawn or garden. When grown in beds or groups they should be planted about 2 feet apart, in very rich soil, which should be liberally enriched annually with rotten stable manure; and in the with rotten stable manure; and in the early spring, before they commence to grow, cut back so as to leave only two or three inches of the new growth of the previous season, and, if extremely large flowers are desired, cut out some of the weaker shoots after growth has commenced. Treated in this manner they will produce enormous panicles of flowers, and the beds will be a solid mass of bloom. They bloom profusely the same season planted. Try them. You will find them more than satisfactory. Prices good until stock is exhausted. Fall or spring delivery.

Hydrangea paniculata grandiflora-25 50 100 18 to 24 inches. \$4.00 \$7.00 \$13.00

2 to 3 feet.... 5.50 9.50 16.50 All of the above will bloom the first

SALIX SALAMONII, From a Photograph Taken Ten Years After Planting.

Salix Salamonii

This is a variety of the Weeping Willow, but not nearly so pendulous as the common form, and we believe it to be the fastest-growing tree in the world, not excepting the eucalyptus, so much planted in California. We cut down one of these Willows in our nursery when it was seven years old, and it measured 13 inches through the trunk. It makes a very good-looking tree, as will be seen by the illustration above, and has the good qualities of leafing out very early in the spring, and of holding its foliage until late in the fall. On account of its starting into growth so early in the spring the fall is the better time for planting this tree.

One-year-old trees, 50 cts. each; \$5.00 per dozen; \$35.00 per 100. Two-year-old trees, 75 cts. each; \$8.00 per dozen; \$50.00 per 100. Trees older than this are really too large to handle.

New Hybrid Philadelphus

French hybridizer Lemoine has produced a The great French hybridizer Lemoine has produced a new race of Philadelphus commonly known as Syringa or Mock Orange that are the most valuable introduction in shrubs in twenty-five years. Not only are the flowers wonderfully improved but they are produced in marvelous profusion and the smallest and youngest plants are covered with flowers. Nothing has ever attracted more attention and admiration in our trial grounds where they have been thoroughly tested.
"Mer de Glace" (Sea of Ice). Undoubtedly one of the

Mer de Glace" (Sea of Ice). Undoubtedly one of the most beautiful shrubs introduced for many years. Everyone is familiar with so-called Syringa or Mock Orange but Lemoine, the great French hybridizer, has improved this old shrub wonderfully. The flowers are globular semi-double, of a glistening pure white and deliciously sweet-scented. It would be impossible for a shrub to bear more flowers and the smallest plants are covered. People who have seen it in our trial grounds have been delighted with this exquisite shrub. \$1.00 each; \$10.00 per dozen. per dozen.

Albatre. An extremely floriferous shrub in the way of the beautiful variety "Mer de Glace", slender branches fur-nished with middle-sized serrate leaves. Full double

flowers produced in dense panicles, pure white. Very sweet. \$1.00 cach, \$10.00 per dozen.

Dame Blanche. Small foliage, upright branches set with semi-double fringed flowers. Cream-white, very fragrant.

50c each, \$5.00 per dozen.

Favorite. The large erect branches are furnished with waxed leaves and carry large single flowers 3 inches wide. Pure white with a bunch of yellow stamens. Small plants. 75c each.

Glacier. Strong and erect stems, medium-sized ovate, serrate leaves. Flowers double, clustered by six or seven, in creat and thickly set periods such parish being size.

in erect and thickly set panicles, each panicle being similar to one enormous double flower. A very good sort. 75c each, \$7.50 per dozen.

Mont Blane. Upright branches, panicles of numerous sweetscented flowers. 50c each, \$5.00 pcr dozen.

Virginal. A vigorous and tall shrub. Flowers in dense
clusters, large and double, pure white. A grand sight.

\$1.00 each, \$10.00 per dozen.

Magdalena. Medium sized flowers; pure white. Very desirable 50c each \$5.00 pcr dozen.

sirable. 50c each, \$5.00 per dozen.

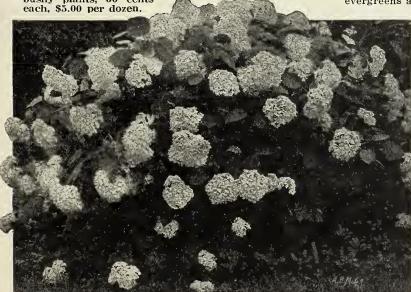

Oeil de Paurpre. Creamy white with blackish purple spot.

Small plants. 75c each, \$7.50 per dozen.

One each of the nine varieties described above will be sent

Hydrangea

Arborescens graudiflora. A splendid improvement on our native Hydrangea. Large panicles of pure white flowers ranging from 6 to 10 inches across, and is in bloom from July until frost; undoubtedly one of the most valuable shrubs introduced for many years. Will thrive in either sun or shade. 30 cents each, \$3 per doz.; extra large, bushy plants, 50 cents

Hydrangea arborescens grandiflora.

Philadelphus-"Mer de Glace."

Hemlock Spruce

It has at last dawned upon the American public that our native Hemlock, Tsuga Canadensis, is one of the most desirable evergreens that can be planted and as a result stock of it is getting low all over the country. Truly it is a splendid evergreen, unsurpassed for form and gracefulness and whether for groups, single specimens or hedges, it is equally desirable. It stands shearing better than other evergreens and makes the finest evergreens and the finest evergreen evergreens and makes the finest evergreen hedge that can

be planted. We have a large and fine stock of this evergreen which we offer at very low prices.

Each feet\$5.00 \$55.00 feet 3.50 feet 1.00 to 5 \$250.00 36.00 to 3 10.00 75.00 1 1/2 to 2 to 2 feet60 to 1½ feet50 6.00 45.00 35.00

Rodgersia

Podophylla. A stately plant, both in foliage and flower; planted in rich, deep soil, in a sunny situation, and liberally supplied with water, produces five-lobed leaves 2½ to 3 feet in diameter, at first bright green, changing to a metallic-brown hue; flowers white, not unlike a Spiraea, and borne in large, fluffy, feathery sprays in midsummer. 25 cents each.

Tabularis. A rare Siberian species with attractive pale green foliage, which in established plants is borne on stems 3 to 4 feet high, and is fully 18 inches in diameter, and retains its fresh and stately appearance throughout the season; its fluffy, feathery white flowers are borne on sprays 6 feet high during midsummer. 50 cents

Gypsophila

Paniculata flore pleno (Double-flowering Baby's Breath). This valuable recent introduction is already a firm favorite with many of the leading professional floral decorators, who quickly recognized its value for use with other cut-flowers. The pretty, little, double rosette-like flowers are produced through the summer in large branching panicles 2 to 3 feet high, and are not only valuable for cutting for immediate use, but can be cut and dried, retaining their beauty for months, and in addition to its great value for cutting it is a most desirable plant in any hardy border. 25 cts. each, \$2.50 per doz.

Doronicum, "Harper Crew"

One of the most effective very early spring flowering perennials. There are many who have only seen this as a single plant, here or there in a hardy border, and have no idea of the effect it has when planted in a mass. It is also a splendid flower for cutting, as it carries well and stands a long time in water, opening out morning after morning, to the surpirse and delight of the possessor. They succeed everywhere, but are especially desirable for planting in partial shade. 20 cts. each, \$2 per doz., \$12 per 100.

Wild English Daisy

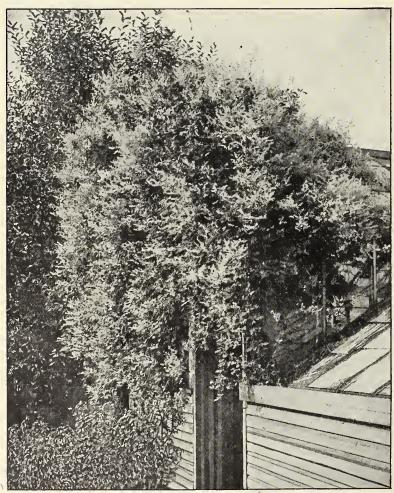

This is the "wee modest crimson-tipped flower" that Burns wrote about and is indeed a most charming little blossom, and one of the few things that can be naturalized in the lawn, for no matter how closely the grass is cut it will continue to thrive and bloom. 50 cts. per doz., \$3.50 per 100.

Calimeris incisa

An attractive plant for the border; grows 12 to 18 inches high, producing from July to September daisy-like, bluish white flowers with yellow center. 15 cts. each, \$1.50 per doz.

Arenaria montana

Beautiful, dwarf, white-flowering plant which will thrive in a dry situation. 20 cts. each, \$2 per doz.

Polygonum Auberti (See page 17).

Mechan's "Mallow Marvels."

Meehan's Mallow Marvels

We have thoroughly tested this new Hibiscus and have found it very beautiful and desirable in every respect. It is a hybrid of the well-known Hibiscus Moscheutos and the tropical Hibiscus so largely grown in Florida, and combines the hardiness of the former with the brilliant colors of the latter. It makes a large bush and produces its immense, brilliant flowers freely from July until frost. The white-flowered varieties are very nearly like the white variety of Hibiscus Moscheutos. In separate colors, Red, Crimson, Pink and White, 40 cts. each, \$4 per doz. Mixed colors, 20 cts. each, \$2 per doz.

Trollius (Globe Flower)

Excelsior. Double orange flowers. 25 cts. each, \$2.50 per doz.

Orange Prince. Brilliant orange flowers. 25 cts. each, \$2.50 per doz.

Earliest of All. Very large flowers of a perfect globe form, and of a most beautiful deep yellow, opening the third week of April. Its early blooming, brilliant color and remarkable abundance of flowers make it a favorite for planting and cutting. It is literally covered with flowers till the end of June. 50 cts. each, \$5 per doz.

Anchusa

Myosotidiflora. A distinct new species from the Caucasian Mountains, growing but 10 to 12 inches high, producing, during April and May, sprays of beautiful forget-me-not-like flowers of rich blue. 20 cts. each, \$2 per doz.

Italica, Dropmore Variety. One of the most important hardy plants of recent introduction, and a grand improvement on the original type of A. Italica, or Italian Alkanet, and a plant which, on account of its remarkable freedom of flowering and its beautiful blue color, is sure to become one of our most popular hardy perennials. It attains a height of 5 to 6 feet, and produces its pretty blue flowers, which are from 1 to 1½ inches in diameter, throughout the entire summer. 25 cts. each, \$2.50 per doz.

Rosa spinosissima

We have again succeeded in getting a stock of this rare and We have again succeeded in getting a stock of this rare and exquisitely beautiful single hardy Rose. In our opinion it is one of the most beautiful things on earth, and is surpassed only by the Cherokee Rose of the South, which is not hardy in our climate. This Rose grows to 4 or 5 feet; compact and bushy in habit, and in June is covered with large, single, yellowish white flowers of indescribable beauty. Planted in groups in the shrubtony it produces an effect to which no description can do justice. bery, it produces an effect to which no description can do justice. Makes a handsome single specimen for the lawn. 40 cts. each, \$4 per doz.

New Rose, Mrs. R. B. Mellon

This is a new single Rose, produced in our nursery, and is a seedling of Rosa spinosissima, with all the characteritics of its parent except that the flowers are exquisitely tinted with pink. The flowers are large and showy, with blush-pink center broadly margined white. Very hardy and somewhat dwarfer than R. The content distinction and beauty. margined white. Very hardy and somewhat dwarfer tspinosissima. A Rose of great distinction and beauty. spinosissima. A each, \$4 per doz.

Polygonum Auberti

A great improvement on the Polygonum Baldschuanicum. The flower-trusses are larger, the flowers pure white; it grows still more rapidly, and does not suffer from the disease which makes the leaves wither and drop from the old variety. A plant in full flower gives the impression of being altogether covered with hoarfrost. Flowers in September and lasts much longer than the Clematis paniculata. As a porch climber, or used as a cover to old trees and stumps, it is a splendid addition to our hardy vines. 50 cts. each, \$5 per doz.

New Astilbe Arendsi

This new type is the result of crossing A. Davidii with A. Japonica compacta, astilboides, and Thunbergii. The plants are of very vigorous growth, 2½ to 4 feet high, producing many-branched, feathered heads of flowers. They prefer a half-shady, moist position in any ordinary garden soil.

Ceres. Delicate, light rose-colored flowers with peculiar silvery sheen.

Juno. Strong, upright grower; plumes of a deep violet-rose color.

Pink Pearl. Bright silvery pink. Vesta. Very graceful plumes of light lilac-rose.

Any of the above, 30 cts. each, \$3 per doz.

Astilbe Florabunda. Very fine flowering variety with white feathery flowers blooming in June. The Astilbes are also known as Spireas. 20 cts. each, \$2 per doz.

Christmas Rose

The Helleborus niger, or Christmas Rose, will flower during the winter time if planted in a cold-frame and covered with glass sash. The flowers are large and striking, of a greenish white. This plant is curious, attractive and interesting. Strong plants, 25 cts. each, \$2.50 per doz., \$15 per 100; extra-strong plants, 35 cts. each, \$3.50 per doz.

Aconitum, or Monkshood

Very desirable for planting in shade or partial shade. Very Very desirable for planting in shade or partial shade. Very pretty and showy during late summer and early fall.

Napellus bicolor. One of the best; showy blue and white flowers.

Fisheri. A dwarf variety, growing 18 inches high, with very large, pale blue flowers.

Pyrenaicum. Racemes of pale yellow flowers in June.

Spark's Variety. The darkest blue in fall. Flowers in June.

Unciniatum. Tall and slender, with panicles of blue flowers.

Any of the above, 25 cts. each, \$2.50 per doz., \$15 per 100.

Cimicifuga simplex

Most valuable by reason of its extreme late-flowering, beginning in September and attaining full perfection about the middle of October, a time when flowers are scarce. Its flowering stems are from 2½ to 3 feet high, terminated with a dense spike of white flowers, which, when cut, last in perfection a long time. 25 cts. each, \$2.50 per doz.

Rhus Typhina Laciniata

This remarkable new variety of our native sumach has the same rapid growth of the common form, but the leaves are so beautifully formed that they rival the most delicate fern in their intricacy.

We have never been able to offer this splendid shrub before. as visitors have always bought all the stock we had of it. 60 cents each, \$6 per doz.

Lychnis Grandiflora

This new Japanese Lychnis attracted much attention in our trial grounds last season. Large fringed apricot flowers 1½ inches in diameter. 40 cts. each, \$4 per doz.

Astilbe Arendsi.

Spirea Kamschatica Rosea

A most stately herbaceous spirea making large clumps four feet high. Large heads of showy lightpink flowers in July. 25 cts. each, \$2.50 per doz.

Viburnum Carlesi

A recent introduction from Korea, producing its delicately spice-scented flowers in May and June. The buds before expanding are of an attractive pink color and develop into Bouvardia-like umbels of white flowers, which last in fresh condition for a long time; entirely distinct and most desirable. \$1 each.

Hardy Garden Pinks

These pinks are very hardy, and bloom with wonderful freedom in May and June. The flowers are greatly varied in color and marking and are delici-ously fragrant. They should be included in every garden. Care must be taken not to cover the foliage with manure or other mulching, in the fall, as it will cause them to rot.

ianthus plumosus. A charming single Pink, with fringed petals. Flowers all of light colors, but greatly varied in markings. Mixed colors, 20 cts. each, \$2 per doz., \$12 per 100.

Dianthus semperflorens. Similar to the above, but darker colors in a great variety of shades and markings; charming. Mixed colors, 20 cts. each, \$2 per doz., \$12 per 100.

Double Varietics of the above, 20 cts. each, \$2 per doz.

Arabis alpina fl.-pl.

This is the double form of the charming Arabis alpina and is quite as beautiful, with the advantage of lasting much longer in flower. A lovely creeping plant, covered with small, white flowers in April; splendid for carpeting, edging of borders or for rockwork. 20 cts. each, \$2 per doz., \$12 per 100.

Centaurea montana alba

The white variety of the perennial Cornflower. 20 cts. each, \$2 per doz.

Myosotis palustris grandiflorus

A form of the Forget-me-not, with larger flowers than the old variety. 15 cts. each, \$1.25 per doz., \$8 per 100.

Pentstemon pubescens

A very showy variety; with rosy purple flowers, blooming in July and August. 15c each, \$1.50 per dozen.

Pennisetum Japonicum

This new Hardy Grass is very desirable. It grows 4 feet high, with slender, graceful foliage and showy plumes thrown well above the leaves. Most valuable for adding variety to the garden planting. 25 cts. each, \$2.50 per dozen,

Pulmonaria saccharata picta

A splendid plant for shade or partial shade. Grows 10 to 12 inches high, and is loaded with bright blue flowers early in the spring, followed by a mass of striking variegated leaves, which are effective until fall. 25c each, \$2.25 per dozen.

Heuchera - "Rain of Fire"

We have thoroughly tested this new Heuchera and find it one of the most desirable hardy plants introduced in many years. It has the same habit and foliage as Heuchera sanguinea, but the color is a more brilliant crimson, and five or six times as many flowers are produced. Blooms in May, and when in bloom is about 15 inches in height. 25 cts. each, \$2.50 per dozen.

Liatris Callilepsis

A new variety of Liatris, similar to Pycnostachya, but dwarfer and blooms a month earlier. It grows 18 to 24 inches high, and blooms the latter part of June. A valuable introduction. 15c each, \$1.50 per doz., \$8.00 per 100.

Dracocephalum Ruyschianum Japonicum

A handsome species, with narrow, hyssop-like leaves and showy purplish-blue flowers. 20c each, \$2.00 per dozen.

Viburnum Rhytidophyllum

A tall, evergreen shrub with long, broadly lanceolate leaves, the upper surface being dark green and much channeled, the under side covered with a whitish tomentum. Large heads of yellowish flowers, giving place to red berries in September. This is a new shrub of great rarity and distinction. Tested in our Princeton, N. J. nursery, it has proven perfectly hardy. \$1.00 each.

Hardy Salvias

Azurea. A Rocky Mountain species; grows 3 to 4 feet high, producing during August and September pretty sky-blue flowers in the greatest profusion. 20c each, \$2.00 per dozen.

Virgata nemorosa. A new and interesting plant for the hardy border, forming a rosette of large foliage, from which the flower-spikes arise, bearing many flowered whorls of dark blue blossoms; the unexpanded buds are light violet-blue, forming a are light violet-orde, forming a harmonious and pleasing color combination. It continues in flower for about six weeks during the early summer months. Grows 18 inches high. 25c each.

Turkeystanica. Very hardy and vigorous, with ample foliage which is very fragrant, and whorls of large, white flowers surrounded by pale pink-edged bracts. 25c each, \$2.50 per dozen.

Oenothera speciosa rosea

A lovely dwarf Evening Primrose, with large white flowers which are tinted with pink. 20c each, \$2.00 per dozen.

Stenanthium robustum

A tall plant with great plumes of feathery, white flowers; very showy and striking. Likes a moist soil and partial shade. 40c each, \$4.00 per dozen.

Genista scoparia elatior

This lovely "Broom" has proven perfectly hardy in our nursery. Its beautiful bright yellow flowers are as fine as any of the greenhouse varieties. Makes a compact shrub about three feet high. 35c each, \$3.50 per dozen. \$3.50 per dozen.

Climbing Hydrangea.

Climbing Hydrangea

We have at last succeeded in getting a stock of the rare Schizophragma hydrangeoides, known as the Climbing Hydrangea. is one of the rarest and most beautiful vines, having large flower-heads similar to those of Hydrangea hortensia, and will make a most splendid ornament to the porch. Fine, strong, pot-grown plants, 50c each; doz., \$5.00.

Pachysandra

erminalis. A trailing plant, 6 to 8 inches high, forming broad mats of bright, glossy green foliage and small spikes of flowers Terminalis. during May and June; invaluable as a cover plant either in sun or shade. \$2.00 per dozen, \$12.00 per 100. 20c each,

Terminalis Variegata. A variegated variety of above. 20c each, \$2.00 per dozen, \$12.00 of above. per 100.

Artemisia lactiflora

One of the best introductions of recent years. It is a plant of noble appearance, 6 to 8 feet high, having beautifully formed, dark green leaves, and bearing feathery spikes, 3 to 4 feet long of the purest white, sweetly fragrant, and flowering in late autumn. A majestic floral ornament which must be seen to be appreciated. 25c each, \$2.50 per dozen.

Salvia Azurea.

Clematis paniculata

This handsome hardy climber is one of the choicest and most satisfactory climbing flowering plants we know. The plant is of strong, rapid growth, with small, dense, cheerful green foliage, giving it a grace and elegance possessed by no other hardy climber, and, even did it not flower at all, it would be one of the most desirable vines. The flowers appear in the greatest profusion during August and continue until late in the fall, are of white color and most deliciously fragrant. The plant succeeds in almost any position: not only is it well adapted to run up all kinds of supports, but it is just as useful for planting among rockwork, sloping banks, or, in fact, in any position where a graceful vine is desired.

		Each	Doz.	100
2-year-old		\$0.30	\$3.00	\$21.00
3-year-old,	extra strong	40	4.00	27.00
4-year-old,	extra strong	50	5.00	40.00

The Oak-Leaved Hydrangea

(Hydrangea quercifolia)

The Oak-leaved Hydrangea, although a native shrub, is one of the rarest, and, in our estimation, one of the most beautiful and picturesque in cultivation. Flowers, foliage and habit all combine to make it the most striking, and it should be included combine to make it the most striking, and it should be included in every planting list. It is rather dwarf and spreading, and plants over 3 feet high are not often seen. The foliage is distinctly beautiful, the leaves being somewhat of the shape of oak leaves, and slightly white on the under surface. As the plants gain age and strength they assume a picturesque relation to the surroundings that gives them unique value. We have secured a small stock of nice plants, which we do not expect will last half through the season; therefore, early orders are suggested to avoid disappointment. 50c each, \$5.00 per dozen.

Cornus stolonifera pendula

This is a new variety of dwarf Dogwood originating in our nursery, which is very valuable for planting on the banks of streams or ponds, or on steep banks. It is a compact, low-growing shrub with pendulous branches. As it spreads from the roots it soon covers a large area closely. It is of the easiest culture and will thrive in almost any soil or situation. 30c each, \$3.00 per dozen, \$20.00 per 100.

New Rugosa Rose, "Blanc Double de Coubert"

The very desirable qualities of the Rugosa Roses have led the hybridizers to attempt the production of new varieties, and many Rugosa hybrids have been offered, but with a single exception they are like the play of Hamlet with Hamlet left out. New colors and forms of flowers have been produced but the vigor and all the desirable qualities of the Rugosa parent have been and an the desirable quantities of a local part of the exception is the Rose named above, which is identical with the Rugosa species in foliage, habit and vigor, but has semi-double, pure white flowers which are most deliciously fragrant. The flowers are produced freely throughout the season. On our grounds it is the first Rose in bloom in spring and the last in the fall. We have known for some years that this was a most reliable Rose, but the stock was so scarce that we didn't dare valuable Rose, but the stock was so scarce that we didn't dare say much about it. Valuable for grouping or planting in the shrubbery, and makes a most attractive untrimmed hedge. 45 cents each, \$4.50 per dozen, \$30.00 per 100.

Pyrus floribunda, var atropurpurea

(Flowering Crab).

A shrub or small tree with symmetrical crown. Leaves ovate, appearing with the flowers, bright green and lustrous, fading with tones of yellow and bronze. Flowers dark rose, produced in great profusion; fragrant. Fruit red, about the size of a pea. on long, slender pedicels. A grand specimen plant and one of the best of the spring-flowering trees. \$1.25 each.

Polish Privet

A New Variety of Absolute Hardiness.

We have tested this very desirable new Privet for several seasons and find it is of ironclad hardiness. Last winter, the severest ever experienced, killed and injured millions of California Privet all over the country, but did not injure a twig of this splendid sort. It is of tall, upright growth with very narrow, dark green leaves which do not drop until very late in the fall. Prices, extra large strong plants, 6 to 7 feet high, 30 cents each, \$3.00 per dozen, \$20.00 per 100; 3 to 4 feet high, 20 cents each, \$2.00 per dozen, \$15.00 per 100.

Clematis paniculata.

A New Race of Hardy Phloxes

Phlox Arendsi

At the great International Exhibition held in London, May, 1912, where this new type of Phlox received an Award of Merit, no other new plant in the Hardy Perennial class attracted such great attention. It originated through the successful crossing of the early-flowering popular Phlox Divaricata Canadensis with the showy hardy varieties of Phlox Decussata. The plants are of vigorous, branching habit, growing, according to the variety, from 12 to 24 inches high. Coming into flower during the latter part of May, they continue in good condition for nearly two months, producing a mass of flowers unknown in other types of Phlox.

Charlotte. Grows 18 to 24 inches high, flowers very large, pale lilac shaded pink with a prominent dark eye; one of the best.

Helene. Of a beautiful lavender-blue color; similar to Divaricata Canadensis; shapely plant; 15 to 18 inches high. 25c each, \$2.50 per dozen.

Phlox Divaricata Laphami

Variety of P. Canadensis, one of the finest hardy perennials adapted for the rockery, for the border and for naturalizing; remarkably free blooming, forms a somewhat shrubby plant, 18 inches in height, individual flowers much larger than P. Canadensis; the heads are larger, and the petals not cleft as in the type. 20c each, \$2.00 per dozen.

Tall English Delphiniums

We are tempted to say that the Improved English Delphiniums are the most beautiful hardy plants in cultivation, but we are also tempted to say this of a score of other things, and, of course, it is impossible to say which is the most beautiful of hardy plants, for they have such an immense variety of beauty that the wonder grows that people continue to plant, by the million, bedding plants which have little or no beauty, are an annual expense, and cost quite as much as hardy plants whose first cost is their only cost, and which increase in size, in beauty, and often in quantity, year after year. These Delphiniums may not be the most beautiful hardy plants, but they are among the most beautiful, and nothing can be more distinct and satisfactory. They are stately and picturesque, some varieties growing 8 feet high in rich soil; they have immense spikes of most beautiful flowers of every imaginable shade of blue, and their season is a long one; in fact, they will bloom from spring till fall if properly treated.

CULTURE OF DELPHINIUMS .- The culture of Delphiniums is exceedingly simple, and the results out of all proportion to the slight amount of care necessary. an proportion to the sight amount of care necessary. They thrive in almost any position, and may be planted at any time of the year, provided that in summer the plants are not too forward, and that they be well watered if the weather be dry. The soil may be a rich, friable loam, which suits them finely; but any soil, even hot and sandy, if well watered and manured will give excellent results. Dig deeply—trenching is hetter—add plenty of sandy, if well watered and manured will give excellent results. Dig deeply—trenching is better,—add plenty of well-rotted manure, and plant about 2½ feet apart. Placed in lines, as a background to a border, or in groups of, say, three plants at intervals, the effect of the Delphinium is exceedingly fine. They look well in beds, also, arranged at the same distance apart each way. They are grand grown in masses of large groups of separate colors, and may be associated with shrubs with great advantage, succeeding well in shrubberies because of their robustness. A succession of flowers may be expected from spring to early autumn, especially if the spikes which have done flowering early be cut down to the ground; fresh growth will then be produced which will give blossom. Conjous watering in summer will be will give blossom. Copious watering in summer will be attended by increased size of spike and flower; in fact, in seasons of prolonged drought, water is absolutely a necessity on many soils if the varieties are to exhibit themselves in their true size and beauty of flower and Top-dressing is greatly recommended on certain soils, instead of the bare surface of the ground being left exposed to the sun. Some of the neater dwarf alpine and other hardy plants may be utilized to plant between and around Delphiniums. Coal ashes strewn over the crowns

will protect the plants from slugs through winter and spring. As we have intimated, any garden soil suits the Delphiniums; it is, however, necessary to secure sorts such as are offered below in order to obtain an effect superior to that afforded by the old smaller-flowered varieties. No amount of liberal treatment will cause the smaller-flowered kinds of a few years back to develop into the gorgeous hybrids of today.

Special Offer of Improved English Delphiniums

I want every one who receives this price-list to try these improved English Delphiniums, and to that end offer them at extremely low prices. I guarantee that they will give unqualified satisfaction in every instance and will be a revelation of beauty to most people. Per doz. Fine Mixed English, grown from seed of fa-

mous named sorts...

Selected Varieties, selected from thousands of seedlings grown from choicest named

3.00 20.00 Extra-selected Varietics, named. Each, 50c. 5.00

Standard Sorts

Belladonna. The freest and most continuous blooming of all, never being out of flower from the end of June until all, never being out of flower from the end of June until cut down by hard frost. The clear turquoise-blue of its flowers is not equaled for delicacy and beauty by any other flower. 20 cts. each, \$2 per doz., \$12 per 100. Chinense. A very pretty variety, with fine, feathery foliage and intense gentian-blue flowers in open panicles. 15 cts. each, \$1.50 per doz., \$10 per 100. Chinense album. A pure white form of the above. 15 cts. each, \$1.50 per doz., \$10 per 100.

Formosum. The old favorite dark blue with white center; 3 to 4 feet high. Very vigorous, free-flowering, and one of the best. 15 cts. each, \$1.50 per doz., \$10 per 100.

of the best. 15 cts. each, \$1.50 per doz., \$10 per 100.

Specimen Plant of Improved English Delphiniums.

Formosum coelestinum. Charming light blue variety of above; most exquisite shade of blue. 20 cts. each, \$1.75 per doz., \$10 per 100.

New Phloxes

The best new Phloxes, recently received from Europe. Antonin Mercie. Light ground-color, one-half of each petal suffused bluish lilac.

sia. One of the prettiest in the collection. shade of mauve, with a crimson-carmine eye.

Astrild. Dense trusses; brilliant cochineal-carmine, shading deeper toward the center.

Baron Van Dedem. Brilliant cochineal-red with salmon

shading; a rich color.

Europa. White with crimson eye; extra large, distinct and fine.

Gefion. Tender peach-blossom-pink with bright rose eye. Grideur. Soft mauve-rose, heavily suffused and overlaid with a deep shade of cerise; very beautiful.

Rheinlander. Salmon-pink, with flowers and trusses of immense size. The color is intensified with a brilliant carmine-red eye.

Riverton Jewel. Lovely mauve-rose, illuminated by a carmine-red eye; large flower.

Rynstrom. A splendid improvement on Pantheon; color not unlike that of Paul Neyron rose; fine for massing. Beautiful shade of salmon-pink, suffused with a

scarlet glow and an almost white halo around its anilinered eye; distinct and extra fine.
anadis. Entirely distinct; a combination of white and Wanadis.

light violet; strong grower, producing immense heads of

C. Egan. One of the finest Phloxes yet introduced. Extra-large flowers and panicles. Delicate, pleasing shade of soft pink.

Any of the above, 25 cts. each, \$2.50 per doz., \$15 per 100.

Hardy Perennial Phloxes

The beauty and usefulness of these grand border plants give to them a deservedly first place among hardy plants. For cutting, their large trusses go a long way in floral decoration. In color they range from pure white to the richest crimsons and purple, and from soft rose and salmon to bright coral-red, all having a delicate fragrance. Perennial Phloxes succeed in almost any soil dencate tragrance. Perennial Photes succeed in almost any son enriched with manure, but are much benefited by a mulching of decomposed manure in spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over, and the plants given a good soaking of water, they will produce a second supply of flowers, thus continuing the display until late in autumn. These later blooms are often finer than the first.

Field-grown plants, 15 cts. each, \$1.50 per doz., \$10 per 100, except where noted.

A. B. Starr. New. Seedling from Miss Lingard, with same good habit; beautiful, rich purple. 20 cts. each.

A. G. McKimmon. Early-flowering; purplish lilac; large truss. Adonis. China-rose, large carmine eye.

Albatre. Large white flower of great substance; fine truss.

Albion. Pure white, faint aniline-red eye.

Astier Rheu. Deep purplish crimson.

Bacchante. Crimson, with carmine eye; dwarf and very bushy; full-flowering.

B. Compte. Brilliant, rich French purple.

Caran d'Ache. Bright salmon-rose, a lovely color.

Champs Elysecs. Fine, rich purplish crimson.

Cheswick. Salmon, bright crimson center. Defiance. Bright deep red; a splendid sort.

Eclaireur. Bright purplish rose, light center; enormous flowers. Edmond Rostand. Reddish violet, shading brighter toward the center of petals; large, white, star-shaped center.

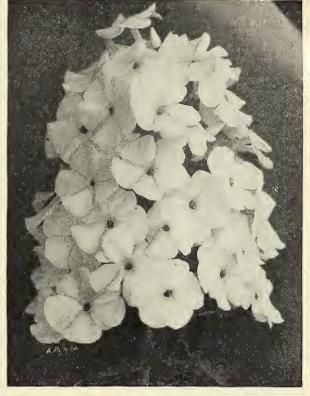

Frau Antoine Buchner. The finest white yet introduced; largest truss and individual flower. Dwarf.

Frau Von Ungerer. Salmon-pink, dark eye.

Embrasement. Salmon-scarlet; extra fine.

Elizabeth Campbell. This is the best Phlox introduced in recent years, and is destined to become very popular. Very bright salmon-pink, with lighter shadings and dark red eye; very beautiful. 20 cts. each, \$2.00 per dozen.

Helena Vacareso. A free large-flowering dwarf white.

Miss Lingard Phlox.

Independence. Fine, vigorous dwarf; white.

Lady Grisel. White, shaded soft gray; buds violet; extra fine; 3½ feet high.

Jean. Deep pink. Large bright-eye; very distinct.

Kossuth. Rose, maroon center. Lothiar. Fine crimson.

Mrs. Jenkins. White; immense

panicles.

Margaret Elliott. White, red center. Extra large panicles.

Miss Lingard. The best Phlox in cultivation. It produces immense heads of beautiful white flowers in June and blooms again September and October Splendid 1981 October. Splendid foliage and habit, and free from at-tacks of red spider. Better results will be had if old flowers are cut off.

Mrs. Miller. Early-flowering; lovely purplish rose.

N. Smith. Dark erimson.

Otto Thalacker. Rosy crimson; dwarf.

Obergartner Wittig. Light rose, center lighter, red eye.

Pearl. Pure white; very late. Pacha. Deep rose, with brighter

eve. Paniculata. Rosy purple; fine for naturalizing in meadows.

Rosenberg. Bright reddish vio-let, with blood-red eye; individual flowers as large as a silver dollar. A Phlox of great distinction.

ebold. Orange-scarlet; very brilliant; good habit; a great Siebold. improvement on Coquelicot in every way.

Sunshine. inshine. Aniline-red, wi crimson eye and light halo. with

Hardy Perennial Phlox Planting.

German Iris

In the Iris family the German varieties rank second in importance, the magnificent Japanese Iris being first, of course. They bloom profusely early in May, are of the greatest hardiness and easiest culture, and should be freely planted in every garden. These Irises are the "Flags" of the old-fashioned gardens. They are most effective when used as edging for a shrubbery or garden border.

Named Varieties, 15 cts. each, \$1.25 per doz., \$8.00 per 100, unless otherwise noted. Mixed Varieties, 10 cts. each, 75 cts. per dozen, \$5.00 per 100.

Ada. Standards dark bronze; falls dark maroon.

Agamemnon. Standards white, blotched and frilled lilac; falls edged violet.

Alvares. Standards light purple; falls dark, velvety purple.

Aurea. A pure, rich, deep yellow; extra-large flower, distinct and beautiful. 30 cts. each, \$3 per doz.

Black Prince (New). Standards soft lilac-purple; falls rich, velvety black; very handsome. \$1 each.

Bridesmaid. Standards white shaded lilac; falls slightly marked with lilac.

Canary-Bird. Standards and falls pale yellow. 25 cts. each. Carlotta Patti. Standards lemon-yellow; falls same, veined

reddish brown; dwarf. Dalmatica. Delicate lavender. Tall, vigorous plant, with very large flowers; one of the finest of all Irises. 25 cts.

each, \$2.50 per doz. Dalmatica, Khedive. Pale blue. 25 cts. each, \$2.50 per doz.

Darius. Yellow and lilac; large flowers.

Donna Maria. White, tinged lilac. Florentina alba. Silvery white; early.

Florentina purpurea. Standards blue; falls velvety purple, upper half veined; beard bright yellow.

Fragrans. Lovely white, edged with violet.

Gluck. Standards white; falls purple; extra-large flowers for cutting.

Standards yellow; falls crimson, reticulated white, Gracchus. with yellow margins. 25 cts. each.

Her Majesty. Lovely rose-pink; a variety of great distinction and beauty. 35 cts. each.

Honorable. Yellow; falls brownish maroon.

John Bull. Standards pale blue; falls white, beautifully veined and tipped violet.

Kharput. Extra-fine blue.

King of Iris. (New.) A striking novelty, with flowers of perfect form, the standards clear lemon-color; falls deep satiny brown, with a broad border of golden-yellow. 50 cts. each. Standards white, delicately shaded blue; falls vel-Ducretius.

vety violet-purple. La Tendre. Standards white, tinted lavender; falls light purple.

Dohengrin (New). Foliage and flowers of gigantic size, of a deep violet-mauve. 50 cts. each.

Doreley (New). Perfect shaped flowers, falls of a deep ultra-marine-blue, more or less veined with creamy-white and bordered sulphur-yellow; the standards are a pale sulphuryellow, making a beautiful contrast. 40 cts. each.

Madame Chereau. Pearly white, daintily edged with lavender. Maori King. Standards bright golden yellow; falls velvety maroon, margined yellow.

Mithras (New). Flowers of good size, standards pale yellow, falls violet, shaded with claret and yellow border. cts. each.

Mrs. Newbronner. Rich deep yellow; extra fine. 20 cts. each. Mrs. G. Darwin. Standards white; falls white, upper half penciled lilac; yellow beard; lovely.

Neglecta. Standards light blue; falls pale purple.

Nibelungen (New). Standards fawn-yellow, falls violet-blue, with fawn margin; distinct and pretty. 30 cts. each.

Othello. Standards indigo-blue; falls velvety purple; yellow

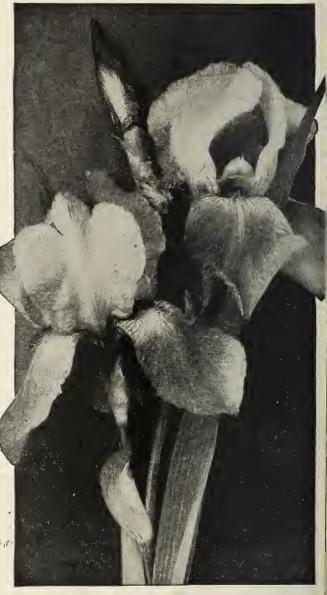

Oroya. Standards light purple; falls dark purple, upper half reticulated white.

Parisienné. Deep purple; dwarf.

Penelope. Standards white, shaded and veined blue; falls white, penciled blue.

President Thiers. Bronze-purple standards; dark purple falls. A most distinct, richly colored flower.

Princess Beatrice. Standards clear lavender: falls deep lavender; the finest of the Dalmaticas. 50 cts. each.

Iris Germanica.

Princess Victoria Louise, (New). Standards pure sulphur-yellow; falls rich plum-color, with cream-colored edges. A new and distinct combination of colors. 50 cts. each.

Queen of the Gypsies. Standards bronze; falls light purple.

Queen of May. Lovely rose-lilac. 25 cts. each.

Rhein Nixe. Standards pure white; falls deep violet-blue, with white margins, will attain a height of 3 feet, with many-branched stems. 50 cts. each.

Souvenir. Standards yellow; falls elegantly reticulated reddish brown.

Stenophylla. White, delicately frilled violet.

Stylosa Innocenza. Exquisitely beautiful, almost pure white flowers, tinted with blue and yellow; a color never before obtainable in German Irises.

Special Offer of German Iris

When selections of varieties are left entirely to us, we supply named German Iris in good assortment at 75 cts. per doz., \$4 per 100, \$30 per 1,000.

Iris pumila hybrida

A cross between I. pumila and I. Germanica. Very showy; early-flowering. 10 to 12 inches high. Citrea. Light and citron-yellow. Excelsa. A splendid pale lemon-yellow.

Schneckuppe. A large, showy, pure white. 20 cts. each, \$2 per doz. One of each for 50 cts.

Iris interegna

An interesting new type, the result of crossing I. Germanica with I. pumila hybrida, and for which there promises to be a great future. They bloom earlier than the German Iris, and the flowers combine perfection of form with large size and clear, decided colors. The foliage is dwarf, and maintains its freshness throughout the season. The flower-stems are almost 18 inches high, holding the flowers well above

the foliage.

Brunettc. Primrose-yellow, bearded orange-yellow.

Don Carlos. Blue standards; falls velvety reddish

purple.

Dorothea. Milk-white, shaded blue.

Ingeborg. Pure white; flowers 5 inches deep with petals 2 inches wide. A grand flower.

Fritiof. The upper petals are pure light lavender-blue, the drooping petals velvety violet.

20 cts. each, \$2 per doz. Set of 4 varieties for 70 cts.

Iris Pseudacorus.

Siberian Iris

Vigorous, free-flowering varieties of the easiest culture; fine for the flower border, for naturalizing and for waterside planting.

ba. White, yellow at base of petals. 10 cts. each, \$1 per doz., \$6 per 100.

Baxteri. Standards blue; falls white, veined and tipped blue. 15 cts. Standards blue; each, \$1.50 per doz.

Blue King. Standards blue; falls bright blue, handsomely marked at base. 10 cts. each, \$1 per doz.

Distinction. Standards blue; falls white, veined with blue. 10 cts. each, \$1 per doz.

nguinea. Rich violet-blue; buds are bright pink and very orna-mental. 10 cts. each, \$1 per doz., \$6 per 100. Sanguinea.

Snow Queen. An exquisite new hardy Iris; the flowers are of a snowy whiteness, large and well formed, produced in great abundance; foliage light and graceful. A gem for flower-border or waterside. 3 feet high. 15 cts. each, \$1.50 per doz.

Superba. Large, violetblue flowers; handsome foliage. Fine border plant and a grand subject for planting near water, where it blooms profusely. 10 cts. each, \$1 per doz., \$6 per 100.

Dwarf Bearded Iris

These Irises have flowers similar to the German Iris, but are much dwarfer and bloom in April. They are extremely free-flowering and desirable.

crates. Bright claret-red, falls deeper claret, beard yellow. Very bright and hand-Socrates. some. 10 cts. each. \$1 per dozen.

Orange Queen. Beautiful clear yellow, with orange beard. 10 cts. each, \$1 per dozen.

Pseudacorus. Semi-aquatic variety; valuable for planting in swamps and on the edge of ponds; vigorous plant with lovely yellow flowers. 15 cts. each, \$1.50 per doz.

Pseudacorus variegata. Same as above with variegated foliage. 15 cts. each, \$1.25 per doz.

Versicolor. The common Blue Flag of our swamps and meadows; valuable for naturalizing. 10 cts. each, \$1 per doz., \$6 per 100.

Iris pumila

These beautiful little Irises do not grow over 4 inches high, and bloom in April and May. They are fine for bordering flower-beds or planting in front of the tall Irises.

Alba. Pure white. 35 cts. each.

Atroviolacea. Dark violet-blue.

Eburnia. Creamy white. 15 cts. each.

Florida. Citron-yellow.

Formosa. Dark blue.

Gracilis. Grayish white.

Lutea. Yellow.

Price, except where noted, 12 ets. each, \$1 per doz., \$7 per 100. Fine Mixture, 8 cts. each, 75 cts. per doz., \$5 per 100.

Siberian Iris.

Japanese Iris

Some years ago a set of Japanese Iris (I. Kaempferi) was sent to us from Japan to test. When these Irises were in bloom they excited the greatest admiration and enthusiasm, and it was hard to convince people that these unique and exquisitely beautiful flowers were as hardy as apple trees, and as easily grown as potatoes. They will thrive in any good garden soil, but if the soil is made very rich and deep, and flooded with water for a month before and during their blooming season, they will produce flowers of a wonderful size, sometimes 10 to 12 inches across. These Irises should be planted in full exposure to the sun. As the Japanese names are unintelligible and impossible to remember, we have renamed this collection.

Since the above collection was received we have annually added to it the newest varieties from Japan and new varieties selected from thousands of seedlings grown on our own grounds, until we now have what is unquestionably the finest and most complete collection of Japanese Iris in the world.

Prices of Japanese Iris

NAMED VARIETIES, described in the following list, 30 cents each, \$3.00 per doz., \$23 per 100, except where noted.

AMERICAN-GROWN, fine mixed, without names, the fine named kinds described below are not included in this mixture, \$1.50 per dozen, \$10 per 100.

Amethyst. Very large, wavy petals, most exquisite lavender shade. 50 cents each.

Blue Belle. Double; blue veined white, center white edged with blue.

Blue Flag. Double. Indigo-blue, base of petals yellow; the latest variety to bloom.

Colonel Thomson. Double; violet, spotted rose. 50c each.Delice. Double; very light delicate lavender, shaded lavender-pink.

Delight. Double; light blue penciled white, yellow center. Distinction. Light lavender-pink, bright yellow blotches at base of petals; distinct and fine.

Dominator. Rich indigo-blue with narrow white stripes and light center; one of the finest and richest colors. 50 cents each.

Gold Bound. Double; pure white; one of the finest.

Planting of Japanese Iris.

Japanese Iris.

Harlequin. New. Three petals, large flower; delicately suffused and spotted with maroon, variable, sometimes splashed with large blotches of maroon.

Hermione. Single. White, maroon center, petals penciled with blue.

Ida. Reddish plum, rich and velvety, narrow yellow band on base of petals.50 cents each.

Kamata. (New). Sky-blue veined white; very distinct. 50 cents each.

Miss Edith Cavell. (New). Double; white veined blue, center blue margined with white. 50 cents each.

Mrs. Henry L. Higginson. Single. Bright reddish maroon, center white.

Mrs. William P. Snyder. New. Six petals; dark maroon, velvety texture; very late; extra fine. 50 cents each.

Mont Blanc. Double. Pure white; large and fine. One of the finest of the white varieties.

Mount Hood. Double; light blue shaded darker; bright orange center.

Nightfall. Great wavy petals of richest, deepest dark blue. New and extra fine. 75 cents each.

Oriole. Double; plum shading to deep plum.

Prince Camille de Rohan. Double; light purple shaded violet, center dark purple.

Pyramid. Double; light blue, center of petal veined with white.

Romola. Single. Lilac, striped with plum, plum center.

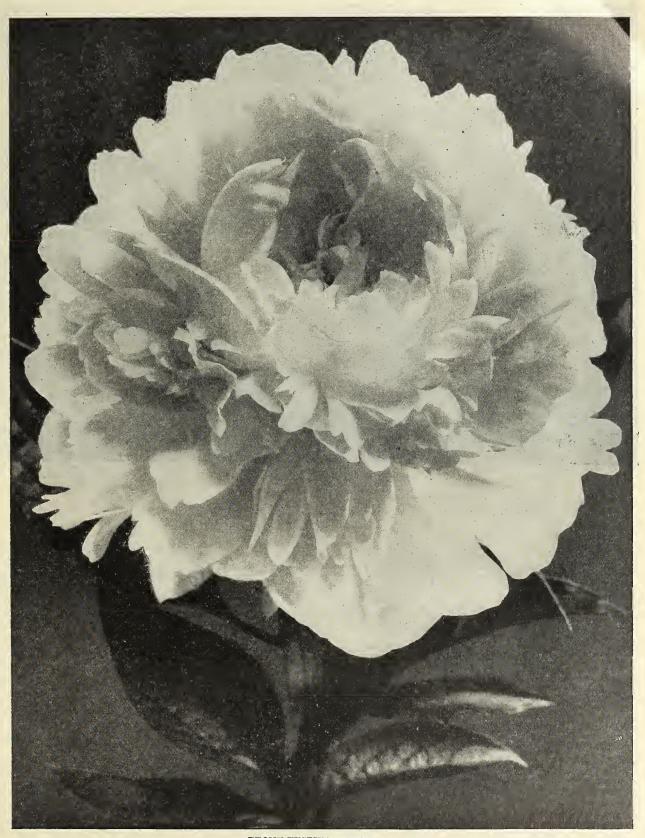

Rosalind. Double. Light purple, freely striped with white. Snowdrift. Single. Pure white.

Templeton. Double; light violet mottled reddish-pink and white; very fine form.

Victor. Double. White veined purple, violet purple center.

Gypsophila

Scorzoneraefolia. Beautiful rose-colored Baby's Breath. It grows from 3 to 4 feet high, and bears the whole summer through a mass of deep rose-colored flowers, while the leaves are glaucous. A distinct novelty and extremely rare. 25 cents each; \$2.50 per dozen.

PEONY FESTIVA MAXIMA.

In Every Respect One of the Most Desirable Peonies in Cultivation.

Avalanche Peonies (see page 23).

Peonies

It gives us great pleasure to see the increasing popularity of Peonies, for there is nothing more deserving, and, when the merit and beauty of the newer varieties are known, every garden will contain a large collection. Like the Irishman's whiskey, all varieties of Peonies are good, even the commonest old fashioned sorts, but there is no language to describe the glorious beauty of the finest of the newer varieties. In no other flower has there been such a marked improvement, and they actually surpass the rose in size, form and coloring, and their ease of culture and extreme hardiness are too well known to enlarge upon. Always having a keen appreciation of these superb flowers, we have for years collected all the varieties obtainable in the world, and now have the largest collection of varieties and the most extensive stock in America. Peonies planted in August or September will bloom the following season. We no longer offer large undivided clumps of Peonies, as we find that they do not give results that justify their cost. Peonies never bring satisfactory flowers the first season after planting and the second season ordinary sized plants will give just as good results as the large plants.

Sin	gle	P	eo	nies	
moot	hoon	477	of	Singl.	_

The merit and great beauty of Single Peonies has been largely overlooked. Planted in masses they are more effective than the double varieties, and fully equal them in the beauty of individual flowers. They come into bloom earlier and last longer.

Sambucus pubens

This is the Red-Berried Elderberry which grows so plentifully in the Adirondacks. It is a vigorous, free-growing shrub that does equally well in sun or shade. The flowers are inconspicuous; but the fruit, which is most freely produced, is extremely effective, being a brilliant crimson in color, which contrasts splendidly with its fine foliage. It is the first shrub to ripen its fruit, being in full color by end of May, when the common Elderberry is in bloom. 40 cents each; \$4.00 per dozen.

Tree Peonies.

Japanese Tree Peonies

If you wish something to try your gardening skill and patience, and to astonish your friends with, by all means plant a group of Japanese Tree Peonics. A lady who had seen them in bloom for the first time wrote: "Their wondrous beauty is electrifying; I am like the countryman who saw a giraffe for the first time and said, "There ain't no such beast!" Truly these Peonies are wonderful. Great, semi-double flowers almost as large as dinner-plates, of the most exquisite coloring and texture. The petals are like the finest India silks, and the colors range from pure white to bright crimson, including the softest and loveliest shades of pink. But these glorious plants, like the Japs who raise them, have some serious faults. They bloom so early that the bud and flower must be protected from late frosts; but their great drawback is that they are grafted on a miserable purple variety of little beauty but great vigor, and, unless watched almost night and day, the "suckers" from the root soon choke out the graft. It is said that this suckering can be discouraged by deep plant-The French growers graft on herbaceous Peonies, which do not sucker; but their varieties are in no way comparable with the Japanese. We are making a large importation of these Peonies in the winter, and orders will be delivered early in the spring. \$1.50 each, \$15 per doz.

Special Offer of Named Peonies

We have a surplus of choice named Peonies, and when the selection of varieties is left to us we will supply them at less than half price. The varieties and plants will be first class, but under no circumstances will we furnish a list to select from.

OFFER NO 1.—Varieties the regular prices of which are \$2.50, \$3.00 and \$3.50 per dozen. \$1.50 per dozen, \$10.00 per 100.

OFFER NO. 2.—Varieties the regular prices of which are \$4 and \$5 per doz. \$2.25 per dozen, \$16.00 per 109.

OFFER NO. 3.—Varieties the regular prices of which are \$6.00, \$7.00 and \$8.00 per dozen. \$3.50 per dozen, \$25.00 per 100.

OFFER No. 4. MIXED.—All colors, single and double. \$1.00 per dozen, \$6.00 per 100, \$55.00 per 1,000.

The above offers are good only until our stock is sufficiently reduced, after which no orders for these offers will be accepted.

New Lilacs on Their **Own Roots**

Of late years there has been a multitude of new varieties of Lilacs grown, and some of them have very great beauty; but, unfortunately, almost all the stock offered, both in this country and Europe, has been budded on privet and is practically worthless, for Lilacs grown on this are certain to die in a few years. Nurserymen bud Lilacs on privet because they can produce a large stock quickly and inexpensively; but one Lilac on its own roots is worth a score of budded plants.

Fifteen years ago we bought all the available stock of choice named Lilacs on their own roots in Europe, and since then we have been both growing and buying until we have a very large and fine stock. On account of their starting into growth so early in spring, Lilacs should

be ordered early.

Price, except where noted, \$1.25 each, \$12 per doz.

Alba Grandiflora. Large spikes of pure white flowers. Congo. Bright wall-flower-red.

Dame Blanche. Double; white.

Emily Lemoine. Double; very large flowers of fine globular form. Rosy lilac; beautiful.

Geant des Batailles. Bright reddish lilac, in large truss-Very brilliant and effective. 75 cents.

Japonica. We have some extra-large specimen plants of this July-flowering Lilac. Immense spikes of pure white flowers. \$1.00.

Alphonse Lavalle. Double, beautiful, clear lilac. Extra large and fine. 75c each; \$7.50 per dozen.

Frau Bertha Damman. One of the very best whites, immense panicles. \$1.00.

Lamartine. Large panicles of mauve-rose flowers; very early. 75 cents.

Leon Simon. Double, compact panicles; bluish-crimson. Lemoinei flore pleno. Double; carmine-violet. \$1.00. Le Gaulois. Double; dark red. Extra large plants, \$1.50.

Madame Lemoine. Superb; double; white.

New Lilac, Marie Legraye.

Villosa Lilac.

Marie Legraye. Large panicles of white flowers. The best white Lilac. 75 cents, \$7.50 per dozen. Michel Buchner. Dwarf plant; very double; pale lilac; 75c.

Negro. Dark violaceous purple.

President Carnot. Double; lilac tint, marked in center with white; extra-large, fine truss. \$1.00.

President Grevy. Double; vinous violet.

Souvenir de Louis Spaeth. Most distinct and beautiful variety; trusses immense; very large, compact florets; deep purplish red.

Toussaint Louverture. Dark crimson.

Villosa. A late-flowering species, blooming a month later than other varieties, with deep pink flowers; extremely free-flowering and effective. Makes a large, splendid specimen. 50 cents.

Virginite. Pure white.

Viviand Morel. Extra-long spikes of large, double flowers of light bluish lilac, with white centers.

Wm. Robinson. Double; violaceous pink. The flower trusses are extra large and the bush is vigorous and hardy. \$1.00. Charles Joly. Double; blackish-red; distinct and extra fine.

Miss Ellen Willmott. Double; pure white; a splendid new variety. \$2.00.

Duc de Massa. Double; purplish violet; large carmine flower heads. 1 . 1

Leon Simon. Double; bluish wall-flower.

President Poincaire. Double; enormous compact and solid heads of flowers; very large flowers thickly set, broad wrinkled lobes; claret-mauve with purplish buds. \$2.00 each.

Madam Kreuter. Beautiful bright rose; single.

La Tour d'Auvergne. Double; purplish-violet flowers in large trusses.

Madam Antoine Buchner. Clusters often more than a foot in length; buds carmine-pink, flowers tender rose tinted malva; late flowering.

Souvenir de Louis Thibaut. Double; very large flowers of a reddish-purple shade.

Plants Suitable for Naturalizing

The most delightful and least troublesome form of gardening is the planting of suitable hardy plants and bulbs in the rougher parts of the grounds and allowing them to take care of themselves exactly the same as the wild flowers. Many plants are perfectly at home in the grass; of course we do not mean the grass of a lawn which must be mown, but the grass of meadows and orchards, along streams and ponds and on the edges of woods and wild shrubbery. We give a few suitable varieties below, but there are scores of others, and we shall be glad to send a list of these when desired.

BELLIS perennis English Daisy). (Double There is nothing more charming for naturalizing than this popular little flower endeared to thousands by Robert Burns' delightful poem. It can even be grown on the lawn, as it accommodates itself to the lawn-mower. White and pink varieties. 60 cts. per doz., \$4.50 per 100.

ASTER Novæ-Angliæ rubra. Everybody knows the wild Asters which make such beautiful pictures along the roadsides in the fall, but this splendid large-

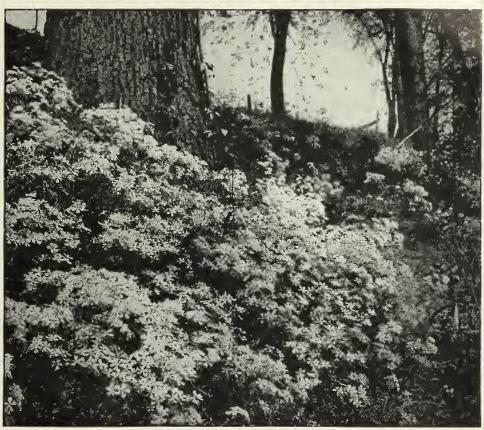

flowered variety does not grow wild throughout the country. Either for naturalizing, for the garden, or for planting among shrubbery, there is no finer fall-flowering plant. \$1.75 per doz., \$10 per 100.

AQUILEGIA Canadensis. This beautiful native Columbine grows wild in many parts of the country. There is no finer subject for naturalizing. It is perfectly at home on a rocky bank or in the grass. \$1.50 per doz., \$10 per 100.

Carulea (True). This charming blue and white Columbine is one of the loveliest of garden plants and just as desirable for naturalizing. \$1.75 per doz., \$12 per 100.

Chrysantha. A bright yellow Columbine that is in bloom for two months. Used with A. cærulea, blue, and A. Canadensis, red, a most charming picture can be made. \$1.75 per doz., \$10 per 100.

HARDY ENGLISH PRIMROSE. One of the loveliest sights in all England are the hardy primroses in bloom in orchard and meadows in early spring. In many places the ground is carpeted with their lovely canary-yellow flowers, which are delightfully fragrant. They are equally hardy here, and nothing can be more delightful, either for naturalizing in orchard, meadow, along a brook, or planting in borders or along the edge of a shrubbery border. 20 cts. each, \$2 per doz., \$12 per 100.

Phlox divaricata Canadensis, naturalized.

CORONILLA varia. One of the prettiest floral pictures we have ever seen was a great mass of this in one of the meadows of Franklin Park, Boston. It completely covered the ground and had piled itself up in a pleasing tangled mass of green foliage and white and pink bloom. \$1.50 per doz.

PHLOX Carolina. A beautiful, bright pink Phlox, which cannot be surpassed for naturalizing. Grows 12 to 16 inches high, and is covered with bright, showy flowers throughout the month of June. Thrives in sun or shade, but will flower more freely in the sun. \$1.50 per doz., \$10 per 100.

Phlox divaricata Canadensis

One of our native varieties that is but rarely met with, and which has been introduced into Europe the past few years as a novelty. A plant that is certain to meet with much favor when better known, as nothing can produce such a cheerful corner in the garden in very early spring. Frequently beginning to bloom early in April, it continues until about the middle of June, with large, bright lilaccolored flowers, which are produced on stems about 10 inches high, in large, showy heads, and are very fragrant. Extremely fine for naturalizing in the woods and shady places. Although this Phlox is usually found growing wild in shady places, it will do better if it is planted where it has full exposure to the sun and will bloom more freely. 10 cents each, \$1 per doz., \$7 per 100, \$50 per 1,000.

Other Choice Hardy Perennial Flowers Suitable for Naturalizing

Butterfly-weed (Asclepias). Orange or yellow day-lilies (Hemerocallis).

Sweet rocket (Hesperis).

Anemone Pennsylvanica. Japanese anemones, white. Iris versicolor.

Iris Sibirica, var. sanguinea. Lythrum roseum. Giant knot-weed.

Forget-me-not (Myosotis). Phlox paniculata. Goat's beard (Spiræa aruncus).

Border of Hardy Plants.

Some Notable Hardy Plants

Elsewhere will be found a very complete list of hardy plants, but the following varieties are especially desirable, and I am in a position to furnish them in quantity at very low prices.

Aquilegias

All of the single, long-spurred Aquilegias, or Columbines, are extremely beautiful, and a collection of them should be a feature in every garden. Foremost among these choice plants are our native Aquilegias. If these and other choice hardy plants were as well known as bedding plants, the day of geraniums, coleus, and other commonplace plants would soon be over. The flowers of these Aquilegias are most lovely and delicate, ranging from white to crimson, including shades of blue and yellow. The exquisite Rocky Mountain Columbine, Aquilegia cærulea, is one of the loveliest flowers in cultivation, and it and Aquilegia Canadensis, which grows wild so plentifully in many localities, are both fine for naturalizing and will thrive if planted in the grass of meadows and allowed to take care of themselves. They are also fine for the formal garden. Assorted varieties, our selection, 20 cts. each, \$1.75 per doz., \$10 per 100. For complete list of varieties, see general list of hardy plants.

Armeria (Thrift)

Attractive dwarf plants that will succeed in any soil, forming evergreen tufts of bright green foliage, from which innumerable flowers appear in dense heads, on stiff wiry stems about 9 inches high. They flower more or less continuously from early spring until late in the fall. Very effective in the rockery and indispensable in the border. Fine for edging beds and borders on account of extremely dwarf habit of growth.

Formosa. Pink. Cephalotes. Bright, rosy pink flowers. Maritima splendens. Bright pink; fine.

20 cts. each, \$1.50 per doz., \$7 per 100.

Ranunculus acris fl. pl.

A double-flowered form of our common Buttercup. Clear yellow flowers in May and June; dainty and beautiful. 20 cts. each, \$2 per doz.

Stokesia cyanea

(The Cornflower, or Stokes' Aster)

A most charming and beautiful native hardy plant. The plant grows from 18 to 24 inches high, bearing freely, from early in July until late in October, its handsome lavender-blue centaurea-like blossoms, which measure from 4 to 5 inches across. It is of the easiest culture, succeeding in any open sunny position, and not only is it desirable as a single plant in the hardy border, but it can also be used with fine effect in masses or beds of any size. 20 cts. each, \$2 per doz., \$10 per 100.

Alba. Pure white variety of above. 20 cts. each, \$1.75 per doz., \$10 per 100.

Spiraea filipendula

A plant of decided merit, growing 2 to 2½ feet high, with fern-like foliage, with loose clusters of white flowers; blooms end of May. 20 cts. each, \$2 per doz.

Large-Flowered Chrysanthemums

We have collected from farm gardens some of the old-fashioned Chrysanthemums which are really hardy and which bloom in October and November, after all other outdoor flowers are gone. Often in bloom when the snow is on the ground; old, established beds are very showy. 3 to 4 feet high. When in bloom are a perfect mass of flowers. Our stock is grown in pots and can be delivered any time during the spring or summer. We offer four large-flowered varieties—White, Pink, Red and Yellow. 15 cts. each, \$1.50 per doz., \$10 per 100.

Blackberry Lily

(Pardanthus Sinensis)

Lily-like flowers of a bright orange-color spotted with red, which are succeeded by seeds that resemble black-berries. Very showy and desirable. 15 cents each, \$1.50 per doz.

STOKESIA CYANEA (see page 32).

Pompon Chrysanthemums, Lilian Doty.

Chrysanthemum latifolium

We have at last succeeded in getting a stock of the true variety of this most beautiful of all the Single Daisies. It is one of the most satisfactory hardy plants for the garden or border, and produces its large, beautiful single white flowers in the greatest profusion. It should be included in every collection of hardy plants. 20 cts. each, \$1.75 per doz., \$10 per 100. Shasta Daisy, var. Westphalia. This is the largest and finest of the Shasta

Daisies—a variety of Chrysanthemum latifolium. 15 cents each, \$1.50 per doz.

Pompon Chrysanthemums

These are the small-flowered Chrysanthemums of the old-fashioned gardens, and bloom in October and November after almost all flowers They are showy in the garden and effective as cut-flowers and, being perfectly hardy and of easiest culture, can be successfully grown in any garden. We offer a fine collection of the best varieties, ranging from white to deep crimson.

10 cts. each, \$1 per doz., \$6 per 100, except where noted. Eagle d'Or. Golden yellow. Fairy Queen. Light pink. Flora. Yellow. Miniature. Lemon-yellow.

Baby, Miniature, Le Bah, Pale pink, Donizula, Light rose,

Dans. Deep pink. Golden Climax. The finest yellow. The flowers are borne profusely and are fine for cutting.

Golden Pheasant. Rich golden yellow.

Golden West. Same as Baby, but twice as large. 25 c Julia Lagravere. Rich garnet; fine for cutting. Lilian Doty. Blush-pink; very lovely; best of its color. Mrs. Vincent. Red tinted yellow. Pink Beauty. Very small, button-like pink flowers. Queen of Whites. Fine creamy white, on long stems.

St. Croats. White. St. Illoria. Silver-rose.

Tiber. Reddish brown.

Wm. Westlake. Golden yellow.

Chrysanthemum latifolium.

NOTABLE HARDY PLANTS-Continued.

Physostegia Virginica alba

An American plant, and by no means a new one; yet it is a flower so unique in its make-up that it stands apart from all others and alone. For massing, planting in association with other appropriate varieties in the border, for planting with shrubbery or for cut-blooms, It is unrivaled. In value it is not equaled by the popular Golden Glow; and it possesses a constitution just as rugged. Its large, graceful profession of white flowers are preduced in greatest profession. spikes of white flowers are produced in greatest profusion from about the middle of June, and if kept cut (so as not to produce seed) it continues to flower in a perfect mass of bloom until frost. The flowers themselves are intensely interesting and attractive, resembling large heather. The stems are long, square, thick, rigid and strong, holding the flowers in a dignified and stately manner when upon the plant and when cut. The plants form large, dense clumps, 3 or 4 feet high, and require no petting, succeeding on all kinds of soil and in all situations. 20 cents each, \$2 per doz., \$12 per 100.

Polyanthus, or Cowslip

This charming spring-blooming plant belongs to the Primrose family, the hardy varieties of which are so very popular in England, but are rarely seen in this country, owing partly to an impression that they cannot be grown in this climate. This is a mistake, as they do very well here. For the front of the borders and shrubbery, for spring bedding, and for naturalizing in moist and partly shaded places nothing can be finer. The coloring in the shaded places nothing can be finer. The coloring in the flowers is especially rich and fine. At this writing we have a long border of these plants in bloom in our garden, and nothing gives us greater pleasure. They are so charming in habit, rich and varied in coloring, and so early to bloom, coming with the spring-flowering bulbs, that nothing can be more acceptable. We use them freely for decorating the dining-table and library windows, taking plants up from the border and putting them in fern-dishes and pots, where they go on blooming as if they had never been disturbed. Their hardiness has been pretty well settled by the severe winter of 1911 and 1912. The minimum temperature at our country place was 24 degrees below zero. Not a single Polyanthus was injured, and they were planted in wet soil at that. 15 cents each, \$1.25 per doz., \$8 per 100. Large-flowered White. An improved variety with very large flowers; very fine. 20 cents each, \$2 per doz., \$9 per 100.

Dianthus Barbatus (Sweet William)

That old-fashioned favorite, the Sweet William, has al-That old-fashioned favorite, the Sweet William, has almost disappeared from our gardens: more's the pity, for its place has been taken by plants of far less beauty. The Sweet William is a fine old plant which produces great masses of bloom of extremely rich and varied colors. The flowers are very lasting and fine for cutting. The plants offered are grown from the finest strains to be obtained in England. We offer them in Pink, White, Crimson, Scarlet or Mixed Colors. Fine, large plants, 15 cents each, \$1.25 per doz., \$8 per 100.

Epimedium (Barrenwort)

A genus of dwarf-growing plants with leathery foliage and panicles of lovely white, yellow and lilac-colored flowers. The foliage of all the varieties offered below assumes the most beautiful tints of color in autumn.

Lilacea. Beautiful lilac. Muschianum. Creamy white. Niveum. Pure white. Sulphureum. Light yellow.

Any of the above four varieties, 20 cents each, \$2 per doz.

Pentstemon pubescens

A very showy variety, with rosy purple flowers, blooming in July and August. 15 cents each, \$1.50 per doz.

In England the Foxglove grows wild, but, notwithstanding this, it is a great garden favorite, as it well deserves to be. For stately and picturesque beauty it is not to be surpassed and, planted in masses in the garden among shrubs or naturalized on the edge of woods, in the orchard or along brooks, it is extraordicated.

Foxglove (Digitalis) Strictly speaking, it is a biennial, but, as it renews itself from self-sown seed, it may be treated as a perennial. Mr. Falconer has naturalized thousands of Foxgloves in Schenley Park, and nothing he has planted attracts more attention and admiration. Planted in the fall, Foxgloves will bloom well the following season. I offer a fine lot of strong plants, grown from the best strains obtainable in Europe. 15 cents each, \$1.50 per dozen, \$8 per 100. Hardy Chrysanthemums (see page 34).

Hardy Ferns

Varieties marked * require shade; those marked † succeed in open border.

- *Adiantum pedatum (Maídenhaír Fern).
- *Aspidium acrostichoides (Wood Fern).
- *Aspidium marginale.
- *Aspidium Goldianum (Shield Fern).
- †Asplenium Filix-fæmina (Lady Fern).
- *Asplenium Thelypteris. †Asplenium Trichomanes
- (Spleenwort).
- †Dicksonia punctilobula (Gossamer Fern).
- †Onoclea sensibilis (Sensitive Fern).

- †Onoclea Struthiopteris (Ostrich Fern).
- †Osmunda gracilis (Flowering Fern).
- †Osmunda Claytoniana (Flowering Fern).
- †Osmunda cinnamomea (Cinnamon Fern).
- †Osmunda regalis (Royal Fern).
- †Polypodium falcatum.
- *Woodsia obtusa.
- Woodwardia angustifolia (Chain Fern).
- †Woodwardia Virginica.

Any of the above Ferns, 20 cts. each, \$1.75 per doz., \$12 per 100.

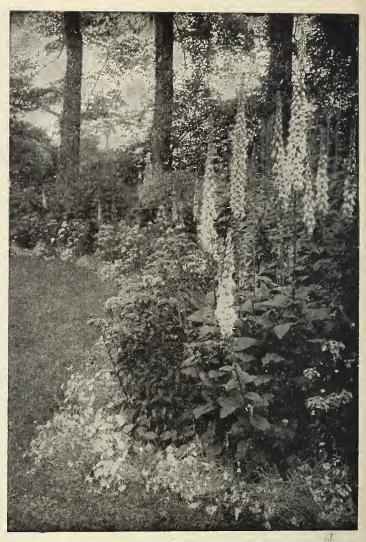

Geum (Avens)

Pretty border plants, growing about 18 inches high, and producing brilliant, showy, bright-colored flowers during the greater part of the summer and fall. ATROSANGUINEUM. Large, dark crimson flowers. COCCINEUM. Showy scarlet flowers.

15 cts. each, \$1.50 per doz.

Improved Gaillardias.

Foxglove (Digitalis). See page 35.

Improved Gaillardias

We consider the Gaillardia one of the most beautiful and desírable hardy plants in cultivation, and believe our strain of these brilliant-flowered plants to be the finest extant. We offer these plants for less than they have ever been sold for, either in this country or Europe. Though such an ornamental addition to the herbaceous border, the perennial Gaillardia is content with exwell-rotted manure. We recommend the Gaillardia for bedding purposes as well as for borders. Give a moderate amount of room and peg down, and a grand effect is to be obtained. Every one will have noticed how grandly Gaillardias have thriven through the recent drought; they seem hardly to need water, but we recommend watering liberally to insure the finest flowers. The Gaillardia which Kelway & Son have been so successful in improving and popularizing is, of course, simply invaluable as a cutflower, on account of its being so lasting when gathered and so brilliant and beautiful. The gay blossoms are obtainable in perpetual profusion from June to November, and the greater the drought and scarcity of other flowers the more the utility of the perennial Gaillardia is demonstrated. No more brilliant and beautiful sight can be imagined than a large bed of Gaillardias, with their profusion of highly colored flowers of all shades. Some of the varieties of this improved strain measure fully 5 inches in Mr. Robinson, in the English Flower Garden, recommends that they should be planted in bold groups, and remarks that no plants have finer effect in a bed by themselves, and we quite agree with him. Extra strong, fine plants, in a splendid assortment of colors, which will be sure to give complete satisfaction. 15 cts. each, \$1.50 per doz. \$10 per 100.

NOTABLE HARDY PLANTS-Continued.

Helianthus

Detiflorus. The best of the summer-blooming varieties of narry Sunflowers; flowers 3 inches in diameter and freely produced. Plant grows 3 to 4 feet high, and spreads rapidly. Fine for cutting, for the border, and for planting among shrubs. 15 cents each, \$1.50 per dozen, \$8

H. G. Moon. New. A grand seedling variety with abundance of large rich golden yellow flowers, rising well above the foliage, extra fine. Height 4 feet. August and September. Award of merit, R. H. S. 20 cts. each, \$1.75 per dozen.

Miss Mellish. An improved variety of Helianthus lætiflorus; of taller growth and having larger flowers. A decided improvement and most beautiful sort. 15 cents each, \$1.50 per dozen.

Hibiscus Moscheutos

We wish to call attention to this extremely showy and satisfactory plant. It thrives in any garden soil, and is equally desirable as a garden plant or naturalized along the edges of brooks and ponds, or planted among shrubs. The plant grows 4 to 5 feet high, is very bushy, and in August and September is covered with immense single flowers 6 to 8 inches across, from pure white to deep rose in color. The pink variety of this plant is the one that grows so abundantly in the Jersey meadows, consequently it is very desirable for marsh and swamp planting.

In separate colors. White, blush-pink and deep rose. 15° cents each, \$1.50 per dozen, \$10 per 100.

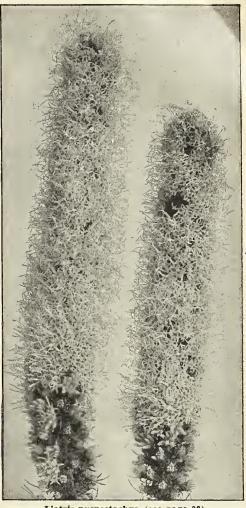

Mixed Colors. Strong plants at a specially low price. \$1 per dozen, \$6 per 100.

Festuca glauca

A dwarf grass with very distinct blue foliage. Does not grow over eight or ten inches high, and is very effective. 15 cents each, \$1.50 per dozen.

Single Hollyhocks.

Liatris pycnostachya (see page 38).

Hollyhocks

Have you ever noticed that painters choose single Hollyhocks as subjects for floral paintings oftener than any other flower. We suppose the reason for this is that artists have a keener appreciation of beauty than other people, and recognize that the common, and we food former than denied size of the Hollyholds. other people, and recognize that the common, and we fear sometimes despised, single Hollyhock, is one of the most stately, picturesque and beautiful plants in the world. Nothing can be more effective than a large group or mass of single Hollyhocks, and once planted they will literally take care of themselves, even if planted in the grass. We know of patches that have not been cultivated or disturbed in any way for twenty years. We are determined to have single Hollyhocks for our landscape gardening work, so we collected seed from old-fashioned (they will soon be new-fashioned) gardens and had thousands of plants grown for our customers. Some people think double Hollyhocks are more beautiful than single. They are mistaken, although the doutiful than single. They are mistaken, although the doubles are beautiful, but inclined to be top-heavy, often need staking and are liable to disease. Hollyhocks planted in the fall will bloom well the following summer.

SPECIAL OFFER OF HOLLYHOCKS

Best Large-flowered, Single, all colors, \$1.50 Per doz. \$10.00 Best Large-flowered, Double, mixed colors 1.75 10.00 Chater's Famous Strain. Best double. In 13.00 Our Hollyhocks are free from disease, and to ensure this we are having them grown in Ohio in soil which is entirely free from the Hollyhock disease.

Two Useful Irises

TECTORUM ALBUM. This is a beautiful white Iris, resembling I. Sibirica in habit and blooming at the same time—early in June. It is extremely vigorous and hardy, and very valuable either for the garden or for naturalizing on the edge of ponds or streams. Thrives in shade. 10 cents each, \$1 per doz., \$6 per 100.

SIBIRICA SANGUINEA. This is the best of the Siberian Irises, and is extremely desirable in every respect. The brilliant blue flowers are freely produced. The plant grows with great vigor and is perfectly hardy. Splendid for the garden, and nothing finer for naturalizing. 10 cts. each, \$1 per doz., \$6 per 100.

Leontopodium alpinum

(Edelweiss, or Alpine Snowflower)

Well known to tourists who have traveled in Switzerland. It is a hardy plant, and well worth a trial. It should be grown either on the rockery or in well-drained sandy soil. 20 cts. each, \$2 per doz.

Saponaria ocymoides splendens

A charming creeping plant, even prettier than the creeping Phloxes. It is quite as free-flowering, and piles itself up in masses that are lovely beyond description; beautiful bright pink flowers produced in June. One really good thing that should be in every garden. Potgrown plants, 20 cts. each, \$1.75 per doz.

Liatris pycnostachya

The popular name of this striking plant is Kansas Gay Feather. Nothing can be planted that will attract more attention on account of its very unusual appearance; but it is very beautiful as well as odd. It blooms in midsummer and throws up long, narrow spikes of rich purple flowers, which last a long time. A peculiarity of this plant is its great attraction for butterflies; when in bloom it is always surrounded by them. 15 cts. each, \$1.50 per dozen, \$8 per 100.

Lychnis splendens, Double Red

(Ragged Robin)

Forms a dense tuft of evergreen foliage, and in June it sends up tall spikes of handsome double, deep red flowers of exquisite fragrance, which remain in perfection six weeks. 20 cts. each, \$1.75 per doz.

Tufted Pansies, or Bedding Violas

The tufted Pansies are hybrids of Pansies and Viola cornuta, and are quite distinct from Pansies in habit and coloring, and we think far more beautiful. The flowers are smaller, but unique in coloring, and the plants spread from the roots like a violet, making them true perenials. They are perfectly hardy, enduring the extremely cold weather of 1911-12 in an open border without protection. They are immensely popular in England and Scotland, where they are generally used for bedding and table decorations, and nothing can be more charming for either purpose. We have always admired these flowers in England, but were not certain that they would thrive in this climate, but after testing them a year in our garden we are convinced that they will do as well here as they do abroad. We have had a splendid lot of plants grown from the best collections in Scotland. They can be planted in the summer, fall or spring. In separate colors or mixed. 15 ets. each, \$1.25 per doz., \$8 per 100.

Mertensia Virginica

(Blue Bells)

An early spring-flowering plant, growing about 1 to 1½ feet high, with drooping panicles of handsome light blue flowers, fading to clear pink. One of the most interesting of our native spring flowers. May and June. 20 cts. each, \$2 per doz.

Hemerocallis, Queen of May

This beautiful Hemerocallis originated as the result of a cross of H. flava major and H. aurantiaca major. The plant has the habit of the father, H. aurantica major with the size and the same beautiful orange-color; but from the mother it has absolute hardiness. It produces twelve to eighteen flowers on stems 5 to 6 feet high, and blooms from May until August. A noble plant. 50 cts. each.

Saxifraga cordifolia

This, the only Saxifraga, or Rockfoil, that is hardy in this climate, is distinguished by its large, handsome, shining foliage, and its dense panicles of lovely, pink flowers which are produced very early in the spring. 20 cts. each, \$2 per dozen.

Hardy English Ivies

We have a fine stock of pot-grown plants suitable for early fall or spring planting. These Ivies are hardy if planted against a north wall. 25c each; doz., \$2.50; 100 \$16.

Iris tectorum album.

Oriental Poppies.

Southernwood

Artemisia Abrotanum (Southernwood, or "Old Man"). 15 cts. each, \$1.50 per doz.

Artemisia stelleriana. A trailing species with handsome silvery gray foliage; 6 inches high. 15 cts. each, \$1.50 per doz.

Platycodon

Very handsome hardy perennials with beautiful large bell-shaped flowers like the Campanulas. They are very effective for borders or for the rock garden.

Mariesi. A valuable dwarf variety, bearing blue bell-shaped flowers nearly 3 inches across, for a long season in late summer and early autumn. One of the finest of border plants. The unopened buds are nearly as beautiful as the flowers themselves, and are particularly interesting in their peculiar shape. Extremely effective when planted in groups. 15 cts. each, \$1.50 per doz., \$10 per 100.

Mariesi nana. The Platycodon, or Wahlenbergia, has been for many years one of the most popular hardy plants, and deservedly so. This new variety is a decided improvement, as the plants are dwarfer and more compact, and never fall over. Beautiful white or blue bellshaped flowers produced in the greatest profusion. This new plant is to be highly commended. Price of either white or blue variety, 15 cts. each, \$1.50 per doz., \$10 per 100. NOTABLE HARDY PLANTS-Continued.

Oriental Poppies

I remember very well the first time I saw an Oriental Poppy. I was a boy then, and it excited me wonderfully, and I thought it the most remarkable flower in the world; and now, after twenty-five years have gone by and I have seen almost all the known flowers of the world, I am still of the opinion that it is mighty fine, striking and effective, and I have taken the trouble to gather and have grown a collection of several varieties. The foliage of Oriental Poppies dies away in the summer, and many think they are dead, but they will start into growth again in the fall. They are rather hard to establish, but once established, prove the most persistent perennial.

Brightness. Rich, glowing salmon. Very large flowers. Fire King. Brilliant crimson.

Lady Roscoe. Soft salmon-red flowers, borne on long stems. Masterpiece. Enormous flowers; silvery blush-pink, suffused mauve, with glossy black blotches.

Mrs. Perry. Salmon-rose; lovely.

Orientalis. The type; bright red. 15 cts. each, \$1.50 per doz., \$10 per 100.

Royal Scarlet. Brilliant scarlet.

Salmon Queen. Large, handsome, soft salmon-scarlet flowers.

Scarlet Giant. Dazzling scarlet with glittering black blotch at base of petals.
Silberblick. Salmon-red with white spots.

Queen Alexandra. Salmon pink.

Prices, except where noted, 20 cents each, \$2 per dozen, \$15 per 100.

Wallflowers

The old favorite fragrant Wallflower. Mixed colors, including yellow, brown, etc. 15 cents each, \$2 per dozen, \$12 per 100.

Cerastium

(Snow-in-Summer)

omentosum. A desirable low-growing plant with silvery foliage, suitable for the rockery, or for carpeting dry, sunny spots, such as covering graves or steep banks. Its Tomentosum. attractive white flowers are freely produced in spring and early summer. 15 cts. each, \$1.50 per doz., \$1.10 per 100.

Biebersteinii. Similar to C. tomentosum, but the flowers are very much more beautiful. The plant is dwarf and covers the ground with a mat of silvery foliage which is almost evergreen. The starry flowers are white and extremely beautiful. They are produced freely in June, The plant is for the rockery, covering dry banks or edging borders. 15 cts. each, \$1.50 per doz., \$10 per 100.

Hemerocallis Planting (see page 38).

Pyrethrums

The Pyrethrums are so simply and easily cultivated that they may be recommended to all who possess a garden, whether small or large. They are perfectly hardy and absolutely invaluable for cut-flowers through the summer and autumn months. The flowers are bright and elegantly borne on long stems; most convenient for vase-decoration. In form the double varieties are somewhat aster- or chrysanthemum-like, and as their chief beauty is in the months of May and June, they may well be designated. Spring Chrysanthemums

as their chief beauty is in the months of May and June, they may well be designated Spring Chrysanthemums, possessing the advantage over the chrysanthemums of being able to withstand the severest winter without protection. The single-flowered varieties are veritable colored marguerites and possess a range of color and hardiness that marguerites might envy in vain. Nothing can surpass the Pyrethrum for profusion of flowers in the season; flowers succeed flowers without stint, and the blossoms are not injured by storm or sun. Their position should be in the border or in beds. The plants may, with advantage, be cut down after June, which will keep up a greater succession of bloom through the autumn. Pyrethrums grow freely in any ordinary garden soil; a good rich loam suits them, perhaps, best, and in order to secure size, brilliancy and number of flowers, plenty of ordinary well-rotted maa good rich loam suits them, perhaps, best, and in order to secure size, brilliancy and number of flowers, plenty of ordinary well-rotted manure may be added to well-trenched, well-drained soil, and plenty of water may be given when they are in bud in the dry summer weather. A mulching may be applied in dry localities with advantage. The older varieties have been greatly improved upon during the past ten or fifteen years, which is the period during which Kelway & Son have made them a specialty, and the refined shape and brilliant or soft shades of the newer sorts have caused the Pyrethrum to become deservedly popular. We offer a splendid lot of plants of the choicest single varieties grown from Kelway's famous strains.

All Colors Mixed. 20 cents each, \$2 per doz., \$12 per 100.

Thalictrum aquilegifolium

This is undoubtedly one of the most desirable hardy plants in cultivation. Its fine habit, beautiful foliage and masses of lovely flowers,

Thalictrum

varying from white to purple through all intermediate shades, make it one of the most handsome things that can be planted. graceful plant of much charm and distinction. Height 2 to 3 feet; blooms in May and June. 20 cts. each, \$2.00 per doz., \$12 per 100.

Polygonum Cuspidatum

A magnificent plant for produc-

A magnificent plant for producing bold masses of foliage, growing 8 feet high in good soil.

Numerous fragrant white, spirea-like flowers issue from the axils of the leaves. A stately plant for large flower-borders, shrubberies, wild gardens, banks of streams and ponds and for growing beneath large trees. 15 cts. each, \$1.50 per doz., \$8 per 100.

garden or lawn plant it is extremely decorative, and equally so as a cut-flower, and very lasting. We have used this a great deal in our landscape work, and have found a large circular group of it surrounded by the dwarfer Rudbeckia speciosa extremely effective. 15 cts. each, \$1.50 per doz., \$9 per 100.

Single Violets

In the varieties offered below, the Single Violets have been brought to such a high point of excellence that they are in equal favor with the double sorts, and, being much easier to grow and free from disease, we strongly recommend the amateur to confine himself to this class. By the use of a cold-frame a fine crop of flowers can be had in the spring and in the fall.

10 cts. each, \$1.25 per doz., \$8 per 100.

California. The variety so popular in California. This is one of the best varieties.

Princess of Wales. A grand variety; very large flowers.

Clematis recta

A dwarf Clematis, with white flowers like those of Clematis paniculata. It grows about two feet high, and is a mass of lovely white flowers in June; very desirable. Fine for planting in front of evergreens. 20 cts. each, \$2 per doz.

Hardy Herbaceous Perennials

Until hardy plants come into general use we cannot hope for artistic, interesting and beautiful gardens in this country. People of taste and culture are realizing the ugliness of the stereotyped bedding with lines of color, and will no longer allow their lawns to be daubed with a flower garden like a colored lithograph, although many of our public parks are still guilty of this atrocious work. With the material offered in this list, the most beautiful and interesting gardens are to be made, gardens that increase in interest and beauty year after year; gardens that change their aspect with every change of season. To make a garden with hardy plants and shrubs requires far more taste and knowledge than it does to make one with a few varieand knowledge than it does to make one with a few varieties of bedding plants generally used, but the majority of gardeners do not have this knowledge, and have no idea of proper arrangement. But the garden of hardy plants has this advantage: the individual beauty of the plants themselves is so great that a garden cannot fail to be interesting and lovely, no matter how badly arranged, if the cultural skill is sufficient to bring them to perfection. One of the most effective ways of using hardy plants is to plant in a wide border in front of a hedge or shrubbery. The trouble with this arrangement is that the roots of the trouble with this arrangement is that the roots of the shrubs or hedge get into the border and rob the plants of a large share of their food. This can easily be prevented by placing a sunken wall of concrete between the hedge or shrubbery and border. This wall need be only 2 feet deep and 4 inches thick, and is inexpensively constructed of gravel and cement. Another very effective arrangement is two broad borders through the vegetable garden, with a broad grass walk between them. The effect will be enhanced by building trellises back of the borders and covering them with climbing roses or flowering vines.

Cultivation is of the simplest: beginning with any good garden soil, deeply dig it and enrich it with old rotted stable manure. The best time to plant hardy perennials

is when they are just starting into growth in the spring or early in the fall. The soil should be comparatively dry when plants are set out. Avoid wet planting. Do not make the mistake of planting too thickly. The nearest approach to a rule which may be followed in planting is to set out plants which grow to a height of 2 feet or less, 12 inches apart, and all taller one-half their height. For example, Aquilegias and Coreopsis which grow 2 feet high may be planted 12 inches apart, while Delphinium formosum and Japanese Iris which grow 3 feet high, should be 18 inches apart.

During the summer, the soil about the plants should be frequently stirred and weeds kept down. During hot, dry weather, or when it is not convenient to water, a mulch of any loose, light material is very beneficial in retaining the moisture and preventing the ground from baking; grass clippings from the lawn are excellent material for this purpose.

About the middle of November, or later, when all soft growth has been killed and the plants are thoroughly ripened, the old hard-wooded stems should be removed and burned. Then cover the plants with 2 or 3 inches, not more, of loose, strawy stable manure. Care must be taken, however not to cover the foliage of evergreen plants such as Phlox subulata, Hardy Pinks and Candytuft, as such a covering would cause the foliage to rot and kill the plants.

Most hardy plants which flower during the spring or early summer months, such as Peonies. Anthericums, Dielytras, Funkias, German Iris, etc., are better left undivided and undisturbed for several years, but they should be given a liberal dressing of stable manure or other feres, Helianthus, Rudbeckias, Asters, Boltonias, Physostegias, etc., are better for being replanted at least every two years. The Japanese Anemones are an exception; they should be allowed to remain, undisturbed, for several years.

Special Offers of Hardy Plants in Variety

Plants in the following collections will be of the best and most desirable varieties and the plants of the best quality, but in every instance the selections of varieties is to be made by us; but if purchasers will state the things they have, or don't wish, these will not be included in the selection. Sometimes people write asking for a list of the plants contained in these collections. This cannot be given, so please save us the unpleasantness of refusing by not asking for it.

Offer No. 4. Five hundred Hardy Plants, same as above, but in larger

35.00

F indicate the number of the month or months the plants bloom in. This is only approximate, as height and time of flowering vary with soils and seasons.

Plants suitable for growing in the shade are marked *. For growing in partial

shade are marked †.

Prices quoted are for not less than half the quantities named, but single plants will be furnished at following low rates: Plants at \$1.00 or less per doz., 10 cts. each; plants at \$1.25 and \$1.50 per doz., 15 cts. each; plants at \$1.75 and \$2 per doz., 20 cts. each; plants at \$2.50 per doz., 25 cts. each.

Anemone Japonica (see page 43).

flowering plant. H 3 to 4, F 9 to 11 Pfitzeri (Flame Flower, or Torch Lily). This new Tritoma is undoubtedly one of		
the most valuable introductions of recent years. Tritoma uvaria, or "Red-hot Poker" plant, is highly prized on account		
of its picturesque appearance and its blooming so late in the fall after almost		
everything else is gone. This new variety is a great improvement in every re-		
spect. The flowers are much more re- fined and beautiful, and are produced in		
the greatest profusion from early sum- mer until late fall, coming into bloom at		
least two months before the older variety.		
It is equally desirable for garden effect or for cut-flowers, and is decidedly un- ique	1 75	11.00

Ornamental Flowering Shrubs

Our stock of shrubs is unsurpassed in quality, but our prices will be found much lower than those made by most nurserymen. As a rule, shrubs are much more effective when planted in masses, and our low prices permits them to be used freely in this way. For a guide in planting, we have indicated the size the shrubs will eventually be, as follows: "H 3-4, S 3-4 June" which means "Height 3 to 4 feet, spread 3 to 4 feet, flowers in June." The sizes given can only be approximate as the size shrubs attain varies considerably with soils and climate.

Shrubs marked * can be grown in partial shade, but they will also thrive in full exposure to the sun.

SPECIAL OFFER OF SHRUBS

We want to encourage the planting of shrubs. To be effective they should be planted in masses, but when dealers or nurserymen ask fifty cents to \$1.00 each for easily grown shrubs there is not much encouragement to plant them freely. We have made arrangements by which we can supply our customers with well-grown shrubs in the best varieties at the extremely low prices quoted below, but in every instance the selection of varieties must be left to us. But in ordering, if it is stated that certain shrubs are not wanted they will not be sent. We guarantee these shrubs to be satisfactory in both quality and variety. We cannot give in advance of filling the order a list of varieties contained in these collections.

Ornamental Deciduous Trees

With the exception of varieties marked with an asterisk (*), we do not grow trees. The following list of trees is selected from the best nurseries in the United States. Orders will be shipped from the nearest nursery that can supply the stock ordered, so as to save freight charges and secure quickest possible delivery; where stock is ordered in considerable variety, it is sometimes shipped from two or more nurseries to secure trees of the best quality. We always endeavor to secure the best stock in the market for our customers. The prices quoted are for trees of the most suitable size for transplanting; extra-large trees of many varieties can be supplied, but are not recommended. If quick results are desired they can be had by taking small- and medium-sized, but perfectly vigorous and healthy trees, and give them liberal planting; for instance, dig a hole 3 feet deep and 5 feet in diameter for each tree, and fill with all good surface soil, mixed with one-fourth of its bulk of rotted stable manure.

It costs considerable to plant trees in this manner, but the results justify the expense, and people often pay from \$10 to \$50 each for larger trees, which always fail, generally dying outright within three years, and never making vigorous, healthy trees. Some kinds of trees may be safely planted much larger than others. Magnolias, Beeches, Tulip Trees, and white-leaved Lindens are difficult to transplant and small-sized trees of these should always be selected. Some varieties should always be planted in the fall, others in the spring, and we shall be glad to advise our customers on these and other points in regard to planting.

Lowest net prices will be quoted on trees by the 100 and 1,000 on application.

Roses for Fall Planting

Dormant Hardy Roses can be supplied from October 25, to December 1, if ordered by October 10th.

We have decided to offer Dormant Roses for fall delivery only, as we find many of our customers delay ordering in the spring until it is too late to plant. It is important in planting dormant Roses to cut them well back, one-half the tops should be cut off when planted in the fall, and any wood that winter-kills should be cut off early in the spring.

The varieties of Roses now offered are innumerable, and this great list is added to every year by a host of new varieties which make an intelligent selection of varieties impossible to most buyers. We have reduced our lists to a few of the very best varieties, and no one can make a mistake in selecting any of the sorts offered.

Hybrid Tea and Tea Roses should be planted in the spring, and a selection of the best varieties is offered in our Spring Catalogue.

Twelve Best Hardy Perpetuals

They are the hardiest of all Roess and make a great show of bloom in June.

Baron de Bonstetten. Velvety blackish crimson; very large, double, fragrant flowers; a strong grower.

large, double, fragrant flowers; a strong grower.

Captain Hayward. Light scarlet crimson; fragrant.

Mme. Gabriel Luizet. Light satiny pink; an exquisite Rose of fine form.

Frau Karl Druschki. This is the ideal hardy white Rose, pure in color, perfect in form; strong grower and remarkably free-flowering; superb in every way.

General Jacqueminot. Brilliant scarlet-crimson; an old favorite and one of the best known Roses; does well everywhere.

Gruss an Teplitz. This is a Rose for everybody, thriving under the most ordinary conditions. Color richest scarlet, shading to silvery crimson; vigorous and always in bloom; very hardy. Magna Charta. Bright pink, suffused with carmine; a beautiful Rose, and a strong, vigorous grower; one of the best.

Mrs. R. G. Sharman-Crawford. Deep rosy pink, outer petals shaded with pale flesh; a beautiful Rose in every respect.

Mrs. John Laing. Soft pink; of beautiful form; exceedingly fragrant and remarkably free-flowering; always does well and stands very close to the top among fine roses.

Paul Neyron. Dark rose; of enormous size; perhaps the largest of all.

Prince Camille de Rohan. Deep velvety crimson-maroon, shaded scarlet; a magnificent dark Rose.

Ulrich Brunner. Bright cherry-red; flowers large and full; a good strong grower and always does well.

Extra strong dormant plants, 50 cents each, \$5.00 per dozen, \$35.00 per 100; ready about October 25th.

Climbing Rose, Lady Gay.

Climbing and Rambler Roses

Climbing and Rambler Roses are valuable for covering porches, verandas, side-walls, pillars, fences, etc. They are unequaled as ornamental plants and will be found as uesful for this purpose as any other climber. They are hardy and require very little pruning.

Climbing American Beauty

A new Rose of great merit. A cross between American Beauty and an unnamed seedling; color a rosy crimson, similar to its popular parent, and with the same exquisite fragrance, a quality rarely found in Climbing Roses. The plant is of strong habit of growth making shoots from 10 to 15 feet in one season, and as hardy as an oak. The flowers are from 3 to 4 inches in diameter, of fine form, and are produced in great profusion, not only in May and June, but there is a fair sprinkling of flowers throughout the growing season. We offer strong, 5-inch pot plants, 50 cts. each.

Single Climbing Rose, Carmine Pillar

Immense, single, scarlet flowers; very striking and beautiful. One of the best for porch use, or for covering unsightly features on the grounds. An old Rose, but rare and desirable. 50 cts. each, \$5 per doz.

Climbing Rose, Lady Gay

A new rambler variety of remarkably vigorous growth, with flowers of a delicate cerise-pink, passing to soft, tinted white. The effect of a plant in full bloom with the combination of the soft white flowers, cherry-pink buds, and the deep green of the foliage is indeed charming. Strong two-year-old plants, 40 cts. each, \$4 per doz.

New Rambler Tausendschon

This is an entirely distinct break, not only in ramblers, but in climbing Roses generally. The individual flowers are very large for this type of Rose, being fully 3 inches across, and of a most elegant and graceful form, not stiff or unnatural, but as beautiful as a semi-double azalea. In color it is a most delightful shade of soft pink when first opening, changing to carmine on the reverse of petals when fully expanded. These are produced in trusses of from ten to fifteen flowers. 2-year-old plants, 35 cts. each, \$3.50 per doz.

American Pillar

A new single-flowering variety of great beauty, which appeals to every one. The flowers are of enormous size, 3 to 4 inches across, of a lovely shade of pink, with a cluster of yellow stamens. These flowers are borne in immense clusters, and a large plant in full bloom is a sight not easily forgotten. They last in perfection a long time, and are followed by brilliant red hips or berries, which are carried late into the winter; and as the plant frequently retains its lovely green foliage until the end of November, it forms a beautiful decorative subject throughout the autumn months. Strong, two-year-old plants, 35 cts. each, \$3.50 per doz.; strong pot-plants, 50 cts. each, \$5 per doz.

Rambler Roses

CRIMSON. It is strikingly beautiful, abcRIMSON. It is strikingly beautiful, absolutely hardy, and no Rose can be used for more purposes. As a climber it is unsurpassed, perhaps unequalled; as a potplant for forcing, the florists are finding it extremely popular. By keeping it cut down it makes a splendid bedding Rose, and a hedge of it is a most beautiful object. 30 cts. each, \$3 per doz., \$23 per 100; a few extra strong plants, 50 cts. each.

FLOWER OF FAIRFELD. A new Rose that is highly recommended. The same habit and color as Crimson Rambler, but a perpetual bloomer. 50 cts. each, \$5 per doz. DOROTHY PERKINS. This is a splendid new shell-pink climbing Rose. It attracted much attention at the Pan-American Exposition, where a bed of fourteen-months-old plants produced a show of bloom unequaled. plants produced a show of bloom unequaled by any other variety. This new Rose is of the same strong habit of growth as Crimson Rambler, and the flowers are borne in clusters of 30 to 40, and sometimes even 50 to 60. The flowers are large for a Rose of this class. very double, sweet-scented and of a beautiful shell-pink. Raised from seed of Rosa Wichuraiana and crossed with that grand old Rose, Mme. Gabriel Luizet. Absolutely hardy. The individual flower is larger than the Crimson Rambler, and is a beautiful shell-pink in color. 30 cts. each, \$3.00 per doz., \$20 per 100.

SILVER MOON. Flowers very large, 4½ inches and over in diameter, pure white in color, petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. These center adds to its attractiveness. These flowers are borne on strong stems 12 to 18 inches long, and are delicately scented. The plant is a strong grower, with large, glossy, bronze-green foliage. Although introduced some years ago, this Rose is still quite scarce. Strong pot-plants, 75 cts. each, \$7.50 per doz.

HIAWATHA. Distinctly different from other Ramblers. Its small, single flowers—deep ruby-crimson, wonderfully bright—

deep ruby-crimson, wonderfully bright—
accentuated by a white eye—are uniquely
borne in long trails of 40 to 50. This is a charming variety
destined to become very popular among Rose-lovers.
Lovers of single Roses will be delighted with it. In our
opinion this Rose is the best and most attractive of all the
recent Wichuraiana and Rambler hybrids, which have been
so freely offered. 20 ets each \$2 per deg.

so freely offered. 30 cts. each, \$3 per doz.
WHITE DOROTHY. Among Rambler Roses, none has justly gained greater popularity than the beautiful pink Dorothy Perkins. The White Dorothy is a duplicate, in all respects save its color, which is a clear, glistening white. A decided acquisition to this class of Roses. Among the multitude of new Roses offered this is one of the few worth planting. Strong two-year-old plants, 30 cts. each, \$3 per dozen.

STANDARD CRIMSON RAMBLER. This Rose, on account of its free-flowering qualities and vigorous growth,

makes a beautiful object when grown as a standard. Fine strong plants, 6 ft. high, \$1.25 each.

EXCELSA. (Red Dorothy Perkins). This is a most beautiful Rose and we look to see it supersede Crimson Rambler as soon as it is better known. The color is a clear, bright crimson with no trace of magenta, and the foliage is always clean and glossy, with never any of the mildew which sometimes makes Crimson Rambler unsightly. 35

cts each, \$3.50 per doz,
YELLOW RAMBLER. Light yellow flowers. 35 cts. each, \$3.50 per dozen.

NEWPORT FAIRY. A strong, sturdy grower, with healthy, bright green foliage. Produces an abundance of lovely single flowers of deep pink color, shaded lighter in center. Charming. 35 cts. each, \$3.50 per doz.

Rosa Wichuraiana

In some respects this Rose, which is also known as the "Memorial Rose," is better than Crimson Rambler, although it lacks the brilliant color of its more advertised contemporary. As a climber for covering porches, trellises and arches, and as a creeper for covering steep banks or

Rosa Wichuraiana covering a stone wall.

any ground needing covering, it is unequaled. The foliage any ground needing covering, it is unequaled. The foliage is a lustrous shining green. In bloom the plant is literally covered with exquisitely beautiful single white flowers, which are followed by an abundant crop of bright red hips or berries, which remain on the plant all winter. The Rose is entirely free from attacks of insects or disease, and is absolutely hardy, root and branch. Strong two-year-old plants, 30 cts. each, \$3 per doz., \$20 per 100; strong one-year-old plants, 20 cts. each, \$1.75 per doz., \$10 per 100.

Rosa Wichuraiana Hybrids

WICHURAIANA RUBRA. Long, green branches; leaves medium size, glossy green; large clusters of single flowers. 1½ to 2 inches in diameter, bright scarlet petals tinted orange-red, white at the base; numerous orange-red stamens; flowers in June. 40 cts. each, \$4 per dozen.

SOUTH ORANGE PERFECTION. This is a gem, with free growth close to the ground, and produces multitudes of the most perfectly formed, double, white flowers, about 11/2 inches in diameter; soft blush-pink at the tips, changing to white. 35 cts. each, \$3.50 per doz.

MANDA'S TRIUMPH. This is a grand hybrid of free growth, with fine foliage and clusters of from twelve to eighteen flowers on even a small-sized shoot, literally covering the plant with its perfectly formed, double, white, imbricated flowers, nearly two inches across; valuable for cut-flowers or pot-plants. 35 cts. each, \$3.50 per doz.

GARDENIA (Wichuraiana X Perle des Jardins). Strong grower, with large green foliage. Flowers produced singly on stems one-half to one foot long. When in bud, hardly distinguishable from Perle des Jardins. Bright yellow, and when open cream-color; 3 to 3½ inches in diameter, incurving toward evening to perfect imitation of gardenia or cane jessamine as to shape and color, hence its name. cape jessamine as to shape and color, hence its name. Flowers are delightfully fragrant and produced freely. 35 cts. each, \$3.50 per doz.

Hedge of Rugosa Roses.

Wild Roses of Various Countries

With the exception of the Japanese Rose, Rosa Rugosa, American nurserymen have ignored the numerous wild Roses—which is unfortunate, for they are undoubtedly the most decorative Roses that can be planted, and splendid effects are to be had with them not obtainable with any other plants; and as a rule they are of the easiest culture, vigorous growers, and entirely free from attacks of insects or disease. The flowers all are, of course, single, but many people, of whom I am one, think single flowers are more beautiful than double ones, which after all are abnormal,

many people, of whom I am one, think single flowers are more beautiful than double ones, which after all are abnormal, and the coloring, form and often the arrangement of single Roses is exquisitely beautiful. I think one of the most beautiful garden pictures I have ever seen was a trellis covered with Rosa multiflora with a border of colored peonies at the base of the trellis. Both peonies and Roses were in bloom. The Rose was literally covered with thousands of its lovely white blooms, each with a center of rich yellow stamens.

These wild Roses can be used in many ways. Some are climbers and can be used for covering anything desirable to cover with a climber; others, like Rosa Wichuraiana, are creepers, and are splendid for covering rough banks; and others are desirable for planting among shrubbery, but especially Rosa rubrifolia, Rosa rugosa and Rosa setigera. Rosa rusposa is now pretty well known, but is deserving of the greatest popularity. It has every good quality, spiendid foliage, immense single red or white flowers, which bloom freely all season and which are followed by large, beautiful red fruit, which lasts until severe freezing weather comes in winter. It should always be planted in masses either by itself or in connection with other shrubbery. It also makes a beautiful hedge. which lasts until severe freezing weather comes in winter. It shoul connection with other shrubbery. It also makes a beautiful hedge.

Lord Penzance's Hybrid Sweetbriers

The Sweetbrier, or Eglantine, is acknowledged by all to possess one of the sweetest perfumes that nature has provided, and its delicious scent is the object for which it is usually cultivated. These new varieties are great improvements upon the old sorts. They are hybrids obtained between the common Sweetbrier and various old-fashioned garden Roses, and are possessed of the following advantages:

The flowers, which are borne in wondrous profusion, are varied in form and color from white, through several shades of pink, to very dark red or crimson. For vigor of growth there is scarcely anything in the Rose world equal Plants three years old have now many shoots on them that rise to the height of 12 feet. 50 cts. each, \$5.00

per dozen.

Terms of Payment

Our terms of payment are invariably cash on delivery, which does not mean that we ship C. O. D., as we will not do so under any circumstances. We deliver the goods and mail bills at the same time, and expect payment within a few days. People unknown to us will please send references with their order.

No Agents Employed

It has been reported to us that swindlers have represented themselves as our agents in various parts of the country. We employ no agents whatever, but do an EXCLUSIVELY RETAIL BUSINESS DIRECT WITH OUR CUSTOMERS.

Prices and Packing

Prices in this list are made subject to stock offered being unsold when ordered, and include all charges for packing plants and bulbs. The packing of trees and shrubs is charged at cost.

Prices quoted are for not less than half the quantities named, but single plants will be furnished at following low rates: Plants at \$1.00 or less per dozen, 10c each; plants at \$1.25 and \$1.50 per dozen, 15c each; plants at \$1.75 and \$2.00 per dozen, 20c each; plants at \$2.50 per dozen, 25c each.

Guarantees

We guarantee all nursery stock furnished by us to be first-class, true to name.

WE DO NOT GUARANTEE STOCK TO GROW, OR RESULTS IN ANY WAY. NO COMPLAINT WILL BE ENTERTAINED THAT IS NOT MADE IMMEDIATELY UPON RECEIPT OF STOCK.

There are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered in good order. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and all are beyond our control.

A catalogue as comprehensive as this must of necessity offer some varieties of difficult culture, and, when these are ordered, we presume the people ordering them have the knowledge needed for their culture. Successful gardening requires knowledge, enthusiasm and perseverance, and these we cannot supply, but we shall be glad to make selections for the "can't-be-killed" class of plants for people who wish them.

Import Orders

Import orders are taken subject to failure of crops.

Shipping Directions

Please give explicit shipping directions, stating whether stock is to be shipped by freight or express, and by what route. Early orders for trees, shrubs and bulbs can generally be shipped safely by freight, but shipments will be sent by freight at the risk of the purchaser only.

Our shipments are made by Adams or Wells Fargo Express Companies. We cannot ship direct by any other companies.

Parcel Post

Bulbs and plants can now be sent by parcel post, but, except for very small parcels, bulbs and plants can be sent better and cheaper by express. For instance, the parcel post rate on a ten-pound package to California is \$1.20. The express companies will carry it for 87 cents, and pay for it if they lose it. When it is to the advantage of our customer to send packages by parcel post, we do so, and send a bill for the postage, as our prices do not include delivery. Express rates have been greatly reduced and made uniform, so that it no longer costs more to ship over the lines of two or more companies than it does over one.

Lectures

We are occasionally asked to furnish lectures for Garden Clubs and similar organizations, and for this purpose we have prepared four lectures, all profusely illustrated with suitable lantern slides. The subjects are as follows:

Gardens at Home and Abroad

With 150 splendid pictures, many of them colored, taken in famous gardens in England and America.

Native Trees and Shrubs

Suitably illustrated.

Roses

With 100 pictures made in rose-gardens throughout the United States, including New England, the South, California, and Oregon.

American Wild Flowers

Suitably illustrated.

Arrangements can be made to have one of our staff deliver any of the above lectures. Terms will be furnished on application. ELLIOTT NURSERY CO.
